## QUESTION 1

Which three of the following components must be elected before the Spanning Tree Protocol can converge in a switched LAN? (Choose three.)

- A. designated ports
- B. duplex operating mode
- C. fast mode ports
- D. root bridge
- E. root ports
- F. BDPU priority

Correct Answer: ADE

---

## QUESTION 2

In which two ways could you minimize the impact of monitoring an industrial network? (Choose two.)

- A. Send random messages to a device and see what the response is.
- B. Do frequent ping sweeps to industrial devices to check for their proper operations.
- C. Make a copy of all the network traffic and analyze it offline.
- D. Use an industrial-network-grade IDS-IPS system.

Correct Answer: CD

---

## QUESTION 3

With a Cisco IE 2000 switch, what does a power status LED indicate when it is solid green?

- A. Power is present on the associated circuit and the system is operating normally.
- B. Power is present on the associated circuit, but there is no correlation to whether the system is operating normally.
- C. The system is operating normally, but power is not necessarily present on the associated circuit.
- D. Power is not present on the associated circuit and the power supply alarm is configured.
- E. The power status LED does not show solid green.

Correct Answer: A

---

## QUESTION 4

Why is SSH preferred over Telnet as a method of accessing a network device to alter or view the configuration?

- A. Telnet encrypts only the login information, not the entire transmission.
- B. SSH requires fewer network resources and no additional configuration.
- C. Telnet is more difficult to use and configure than SSH.
- D. SSH encrypts the login and session information.

Correct Answer: D

---

## QUESTION 5

With a Cisco IE 2000 switch, what does a port status LED indicate when it is alternating green and amber?

- A. The port is sending or receiving data.
- B. A link is present.
- C. No link is present.
- D. There is a link fault.
- E. The port is not forwarding.

Correct Answer: D
