QUESTION 1

A technician has completed an Application Integration Engine (AIE) High Availability (HA) active directory mode installation.

Which action should be taken in the AIE GUI (Server Status window) to verify the node configuration before starting the AIE configuration?

- A. Ensure Cluster Status is set to Server Clustered on Node A only.
- B. Ensure Cluster Status is set to Server Clustered on Node B only.
- C. Ensure Cluster Status is set to Server Clustered on Nodes A and B.
- D. Ensure ClusterStatus is set to AD (active directory) on Nodes A and B.

Correct Answer: C

QUESTION 2

A technician is installing Avaya ACETM Microsoft Communicator Add-in as part of a customer's Microsoft Lync Integration solution. All required network element integration tasks are complete. The technician has locally deployed the software on a customer's desktop and is ready to install the add-in. What is the next step to install the Avaya ACPTM Microsoft Communicator Add-in?

- A. Launch the Installation by double-clicking on the DCE.configurator.msi file
- B. Launch the Avaya ACE Configurator to configure the settings Avaya ACETM Microsoft Communicator Add-in
- C. Launch the installation by double-clicking on LyncSdkRedist-4.0.7577.124.msi file
- D. Launch the installation by double-clicking on LyncIntegration-.msi file

Correct Answer: A

QUESTION 3

A technician has completed the installation of an Avaya ACETM on Linux High Availability (HA) configuration. While performing the final verification, it is discovered that a failover has occurred to the Standby server. To determine what caused the failover, where can more detailed information be obtained?

- A. Review performance metrics online using the Avaya ACETMGUI (Performance - System Metrics).
- B. Review the troubleshooting documents from the Avaya ACETM GUI (Help - Product Documentation - Troubleshooting).
- C. Review query active alarms using Linux commands.
- D. Review log files from the Avaya ACETMGUI (Fault-Logs Download).

Correct Answer: D

QUESTION 4

A technician has installed an Avaya ACETM and Avaya Aura® solution. An Avaya Aura® TR/87 service provider is configured and is in service.

A web application is sending Avaya ACETM a MakeCall request with a calling party of tel:16135558755 and called party of tel:16135558754. The call is not connected as expected even though the correct Avaya Aura® service provider is being selected on Avaya ACETM. What is a likely problem with the Avaya Aura® service provider configuration on Avaya ACETM?

- A. The calling and called party rules are not inserting a \$ after the tel: in the translation rules.
- B. The calling and called party rules are not removing a^after the tel: in the translation rules.
- C. The calling and called party rules are not inserting a ? after the tel: in the translation rule.
- D. The calling and called party rules are not inserting a + after the tel: in the translation rules.

Correct Answer: B

QUESTION 5

A customer is considering adding Avaya ACETM to their existing network which already includes Microsoft Lync. In verifying the environment, which integration mode does AIE require to support Lync integration?

- A. High Availability mode
- B. Active Directory Mode
- C. Non Active directory mode
- D. IISMode

Correct Answer: B
