### QUESTION 1

A technician is deploying an Avaya ACETM on Linux for a High Availability (HA) Configuration. The Avaya ACETM software components have been installed on HostA and a message has been received that the setup of Avaya ACETM is complete on HostA.

What is the next step In the Installation process?

- A. Run the ace\_service\_control.bat file.
- B. Configure the host files.
- C. Perform a manual switchover.
- D. Continue the install procedure on HostB.

Correct Answer: D

---

### QUESTION 2

A technician is installing Avaya ACETM Microsoft Communicator Add-in as part of a customer's Microsoft Lync Integration solution. All required network element integration tasks are complete. The technician has locally deployed the software on a customer's desktop and is ready to install the add-in. What is the next step to install the Avaya ACPTM Microsoft Communicator Add-in?

- A. Launch the Installation by double-clicking on theDCE.configurator.msi file
- B. Launch the Avaya ACE Configurator to configure the settings Avaya ACETM Microsoft CommunicatorAdd-in
- C. Launch the installation by double-clicking on LyncSdkRedist-4.0.7577.124.msi file
- D. Launch the installation by double-clicking on LyncIntegration-.msl file

Correct Answer: A

---

### QUESTION 3

A customer plans to deploy an Avaya ACETM on Linux High Availability (HA) solution at its main campus. The customer network includes an Avaya Aura® 6.0 communications platform and a mixture of IP deskphones and clients. A technician has informed the customer that a supported power fence technology is required.

Which statement identifies the role of power fencing in an Avaya ACETM base (core) architecture for the planned solution?

- A. Isolate a Linux cluster member, preventing it from accessing shared resources such as the database or network call servers.
- B. Distribute data across several physical disks that appear to the operating system/user as a single disk.

- C. Isolate the Avaya Aura@Session Manager to protect it from network disruptions that might impact its performance.
- D. Provide a redundant communication path for incoming web service requests.

Correct Answer: A

---

#### QUESTION 4

A technician is adding a Tandberg Video Communication Server (VCS) service provider to provide web services and enable communications between Avaya ACETM client applications and a Tandberg video communication system. While configuring the Tandberg VCS as a service provider, a prompt is received to select a port used for signaling. It has been determined that the default value is acceptable.

Which variable matches the signaling port to define the Tandberg VCS service provider?

- A. 5060
- B. 8012
- C. 9080
- D. 9443

Correct Answer: A

---

#### QUESTION 5

A technician is installing an Avaya ACETM Office Add-in Desktop Enablement solution and has confirmed that all of the system requirements are met. Which step is first in the Office Add-in deployment process?

- A. Install Internet Information Services (IIS) Version 6.0 on the administrative PC.
- B. Install the Application Integration Engine (AIE) platform software.
- C. Install the Avaya ACETM DCEConfigurator.
- D. Build the Office Add-in install package.

Correct Answer: C

---
