QUESTION 1

A technician is deploying the Hot Desking application in an existing customer network. The Avaya ACETM base (core) solution and other platform hardware and software are installed and fully operational. Contact information is being defined for a Hot Desking user in the Avaya ACETM GUI.

The user's office telephone has an E.164 number of + 12245552990. The calling line identification for the user's office telephone should display to called parties even if the office telephone is forwarded to a different number.

Which Avaya ACETM contact information configuration meets the user requirements?

- A. Contact Type = Telephone
Contact Identifier = sip:+12245552999
Contact Name = deskphone
Priority=0.09
Default CLI = Enabled
- B. Contact Type = Telephone
Contact Identifier =tel:+12245552999
Contact Name = deskphone
Priority=0.09
Default CLI = Enabled
- C. Contact Type = Voice
Contact Identifier =tel:+12245552999
Contact Name = deskphone
Priority=0.09
Default CLI = Enabled
- D. Contact Type = Telephone
Contact Identifier = tel:+12245552999
Contact Name = deskphone
Priority=0.09
Default CLI =Disabled

Correct Answer: B

QUESTION 2

A customer has deployed Avaya ACETM and wants to implement a cost-effective security strategy to ensure traceability if secure communication stops working. The customer also wants centralized management to remind administrators when they need to generate new certificates. Company communications are primarily internal. Which security configuration matches the customer requirements?

- A. self-signed certificate
- B. self-signed certificate with certificate trust relationship
- C. certificate based on a customer-managed certificate authority
- D. third party certificate authority-managed certificate

Correct Answer: C

QUESTION 3

A customer plans to deploy the Avaya ACETM Event Response Manager application. Which platform hardware is required at a minimum beyond the Avaya ACETM base to support the solution?

- A. a Windows server to host the AIE and a second Windows server to host the Event Response Manager
- B. a Linux or Windows server to host the AIE and a second Windows server to host the Event Response Manager

C. a Linux or Windows server to host the AIL and a second Linux or Windows server to host the Event Response Manager

D. a Windows server to host the AIE and the Event Response Manager

Correct Answer: D

QUESTION 4

A technician has completed an Application Integration Engine (AIE) High Availability (HA) active directory mode installation.

Which action should be taken in the AIE GUI (Server Status window) to verify the node configuration before starting the AIE configuration?

A. Ensure Cluster Status is set to Server Clustered on Node A only.

B. Ensure Cluster Status is set to Server Clustered on Node B only.

C. Ensure Cluster Status is set to Server Clustered on Nodes A and B.

D. Ensure Cluster Status is set to AD (active directory) on Nodes A and B.

Correct Answer: C

QUESTION 5

A technician is deploying the Avaya ACETM Mobility solution. All required platform software has been installed and the Mobile Cost Optimizer application is ready to be distributed to end users. When can end users obtain the Mobile Cost Optimizer application?

A. from the Avaya ACETM GUI Help menu

B. from the Avaya ACETM base software disk

C. from the Mobility software disk

D. from the Application Integration Engine (AIE)

Correct Answer: D
