### QUESTION 1

What is left on the client disk when a file is migrated using IBM Tivoli Storage Manager space management?

- A. a mig file
- B. a stub file
- C. no file is left
- D. a directory file

Correct Answer: B

When a file is migrated from your local system to Tivoli Storage Manager storage, a placeholder, or stub file, is created in place of the original file. Stub files contain the necessary information to recall your migrated files and remain on your local file system so that the files appear to reside locally. This contrasts with archiving, where you usually delete files from your local file system after archiving them.

---

### QUESTION 2

What is the meaning of the RETONLY parameter?

- A. The number of days to retain a backup version after that version becomes inactive.
- B. The maximum number of backup versions to retain for files that are currently on the client file system.
- C. The maximum number of backup versions to retain for files that have been deleted from the client file system.
- D. The number of days to retain the last backup version of a file that has been deleted from the client file system.

Correct Answer: D

RETOOnly determines the number of days to retain the last Exchange Server database backup version of a database that has been deleted from the Data Protection for Exchange client system.

---

### QUESTION 3

What does the preschedulecmd option accommodate?

- A. It enables deduplication on the client.
- B. It tests out a schedule prior to running.
- C. It gives this schedule higher priority over other schedules.
- D. It executes an operating system command before the scheduled action.

Correct Answer: D

The preschedulecmd option specifies a command that the client program processes before it runs a schedule. The

client program waits for the command to complete before it starts the schedule.

---

#### QUESTION 4

What is used to create customized IBM Tivoli Storage Manager (TSM) reports in TSM Reporting and Monitoring?

- A. PERL
- B. NDMP
- C. COBOL
- D. COGNOS

Correct Answer: D

You can create your own custom reports using IBM Cognos 8 Business Intelligence, or you can install the Business Intelligence and Reporting Tools (BIRT) software.

---

#### QUESTION 5

The host application creates transaction logs and rotates old logs to a temp directory every hour.

Which action ensures the logs are saved to the IBM Tivoli Storage Manager server before deleting them?

- A. Use continuous data backup of the temp directory.
- B. Archive the temp directory hourly and specify the DELETEDFILES option.
- C. Run a snapshot and specify the post-snapshot script to delete old logs.
- D. Run an incremental backup and use the host scheduler to delete log files.

Correct Answer: B

Use the deletefiles option with the archive command to delete files from your workstation after you archive them.
