QUESTION 1

Which option BEST describes how the level of risk is determined?

- A. The likelihood of an adverse event happening multiplied by the cost of preventing it
- B. The consequences of a potential problem multiplied by the cost of possible legal action
- C. The impact of an adverse event multiplied by the likelihood of that event occurring
- D. The likelihood and the probability of a hazard occurring

Correct Answer: C

QUESTION 2

Which of the following are valid testing principles?

- I) Exhaustive testing is in general impossible.
- II) Exhaustive testing should be executed for code intended to be reused.
- III) Testing may guarantee that a program is correct.
- IV) Testing cannot guarantee that a program is correct.
- V) Defects cluster together in certain areas of the product.

- A. I, IV, V
- B. I, V
- C. I, III
- D. II, IV

Correct Answer: A

QUESTION 3

Test script TransVal 3.1 tests transaction validation via screen TRN 003B. According to the specification (PID ver 1.3 10b iv) the validation screen should not accept future dated transactions. Test script TransVal

3.1 passes. Test script eod 1.4 tests end of day processing and is run after the execution of TransVal 3.1 using data entered during that test

Which of the following is the BEST detail on an incident report? [K3]

- A. Title. End of Day failure.. Reproducible. Yes. Description. Script eod 1.4 fails when the first transaction of the day is a future dated transaction. Screen shot of the failure attached.

B. Title. Transaction input screen validation..Reproducible. Yes. Description. Script eod 1..4 fails . Screen shot of the failure attached. Validation of transaction entry on screen TRN-003B should not allow future dated transactions see PID ver 1.3 para 10b iv.

C. Title. Screen TRN-003B validation of transaction date.. Reproducible. No. Description. When a future dated transaction is processed by the end of day process, a failure can occur. This does not always happen. Screen shot of the failure attached.

D. Title. Screen TRN-003B validation of transaction date. Reproducible. Yes. Description. Script eod 1.4 fails when the first transaction of the day is a future dated transaction. Screen shot of the failure attached. Validation of transaction entry on screen TRN-003B should not allow future dated transactions see PID ver 1.3 para 10b iv.

Correct Answer: D

QUESTION 4

Which of the following could be a disadvantage of independent testing?

- A. Developer and independent testing will overlap and waste resources.
- B. Communication is limited between independent testers and developers.
- C. Independent testers are too slow and delay the project schedule.
- D. Developers can lose a sense of responsibility for quality.

Correct Answer: D

QUESTION 5

A software application is supposed to calculate square root of all integers from 1 to 32767. The tester divides the input into valid and invalid equivalence classes. Valid equivalence class: 1-32767, invalid: all negative numbers, all numbers > 32767, all non-integers etc. However, when square root for all numbers in the valid equivalence class was calculated, it was found that for 3 number, the results were incorrect. These number were not the boundary values. Which of the following is correct?

- A. It is sometimes possible to find that some values in equivalence class do not behave in the same manner as rest of the class.
- B. The tester should always try all possible.
- C. It is practically impossible for values in an equivalence class to behave in different manner.
- D. The tester chose equivalence classes incorrectly.

Correct Answer: A
