

## H13-622<sup>Q&As</sup>

HCNP-Storage-CBDS (Constructing Big Data Storage)

### Pass Huawei H13-622 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.leads4pass.com/h13-622.html>

100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by Huawei  
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

## QUESTION 1

Which of the following are considered when planning the deployment of an N8000 clustered NAS storage system?  
(Select three)

- A. Evenly distribute service loads among all cluster nodes. Employ port bonding to increase network bandwidths and enhance protection capability.
- B. Plan the types of file systems for the storage system based on the performance and data integrity requirements of customers\' environments.
- C. Plan various RAID groups for the storage system to address the data integrity and read/write performance requirements of different application scenarios.
- D. Select operating systems based on application requirements.

Correct Answer: ABC

---

## QUESTION 2

Which of the following statements about InfiniBand is false?

- A. InfiniBand features high bandwidth, low latency, and superb scalability.
- B. InfiniBand is often applied to connections between servers.
- C. InfiniBand will be widely promoted in the field of Internet network connectivity.
- D. Switches are basic components of an InfiniBand structure.

Correct Answer: C

---

## QUESTION 3

Huawei OceanStor 9000 employs decentralization. Therefore, the Wushan distributed file does not have performance bottlenecks. As the number of nodes increases, the storage capacity at the computing capability increase linearly, which in turn provides linearly increasing bandwidth and concurrency capabilities for users.

- A. True
- B. False

Correct Answer: A

---

## QUESTION 4

In the software architecture of Huawei OceanStor 9000, the distributed object storage layer is built based on the distributed file storage layer.

A. True

B. False

Correct Answer: B

---

## QUESTION 5

Which of the following statements about the characteristics of the file system snapshot feature provided by an N8500 clustered NAS system are incorrect? (Select two.)

A. A snapshot and the file system each use independent storage space to ensure data reliability.

B. A file system snapshot is a view identical with the file system.

C. File system snapshots are readable, writable, and independent of the file system.

D. You can create multiple snapshots for a file system. However, you cannot create a snapshot for an existing snapshot.

Correct Answer: AD
