QUESTION 1

Your customer has multiple c7000 enclosures with Virtual Connect modules. The customer intends to use HP OneView, but before adding enclosures to HP OneView, all VC modules must be updated to the common, supported baseline. Which tool should you use to update the VC modules?

- A. Virtual Connect Support Utility (VCSU)
- B. Virtual Connect Manager (VCM)
- C. Virtual Connect Deployment Tool (VCDT)
- D. Virtual Connect Enterprise Manager (VCEM)

Correct Answer: A

Explanation:

I'm after some assistance fairly urgently. Does anyone know where I can get hold of Virtual Connect Support Utility 1.8? This is required to upgrade Virtual Connect to 4.01, but doesn't seem to be on the Virtual Connect driver and software download page. The latest seems to be 1.71. Any assistance would be much appreciated.

Info from Gallig:

Latest VCSU version is 1.8.1.

Available for windows here:

QUESTION 2

How can you access smart storage administrator on an HP ProLiant gen9 server?

- A. By booting the server from smart CD
- B. Through the HP OneView Dashboard
- C. Through a special applet in the iLO4 Card
- D. Through HP intelligent provisioning

Correct Answer: D

- **Accessing ACU in the online environment**—This method requires an administrator to download the ACU executables and install them. You can run ACU online after launching the host operating system.
-

**Note**

The HP **Smart Storage Administrator (SSA)** configuration utility replaced the ACU starting with Intelligent Provisioning 1.50.

QUESTION 3

Which JL04 functionality enables secure export of the Active Health Log to HP Support?

- A. Intelligent Provisioning
- B. Agentless Management Service
- C. Embedded Remote Support
- D. Intelligent Resilient Framework

Correct Answer: C

Explanation:

Embedded Remote Support

Embedded Remote Support enables you to easily and securely **export** the Active Health file to an HP Support professional to help resolve issues faster and more accurately. HP Support can receive this data automatically, so it can solve even the most elusive, intermittent issues in a minimum amount of time and with little effort by the local administrator.

QUESTION 4

You have a c7000 Enclosure fully equipped with Gen9 Server blades. With HP management platform does HP recommend to manage this environment?

- A. HP Server Automation
- B. HP insight Diagnostics
- C. HP insight Control
- D. HP OneView

Correct Answer: D

QUESTION 5

On which API is HP OneView's open development program built?

- A. JAVA
- B. UEFI
- C. RESTful
- D. Net

Correct Answer: C

Explanation:

REST API and OneView

OneView features an open development platform designed to adapt rapidly to business needs. This programmable platform, built on the REST API, allows enterprises to scale beyond data center walls to the cloud.

After you set up the OneView appliance, you can configure the software-defined templates automatically. For example, you do not have to set up clustering on your own, establish the heartbeat network, install the management server operating system, install the application, or configure separate services.
