QUESTION 1

In a meeting held with the goal of validating a set of requirements, two participants become involved in an in-depth discussion about the content of a requirement. One of the participants is of the opinion that the requirement must be realized as described, since the success of the product is otherwise jeopardized. The other party dissents and argues that this requirement cannot be realized technically as described. What is the best way for you to react to this situation? (1 Point)

- A. You note both arguments and let the project manager make the decision.
- B. You invite all stakeholders to a workshop and try to reach agreement.
- C. You prefer the second opinion since you believe that the discussion makes no sense if the requirement cannot be realized.
- D. You get together with the affected stakeholders and attempt to reach an agreement on this.

Correct Answer: D

QUESTION 2

You carry out modelling of requirements with a use case diagram. Which answer best describes its prospective modelling elements? (1 Point)

- A. Objects, activities and associations
- B. Actors, messages and activities
- C. Objects, use cases and activities
- D. Actors, use cases and associations

Correct Answer: D

QUESTION 3

Requirements elicitation: Your company has received a customer contract to develop a system for the scheduling of the customer's delivery vans. It is your task to identify the requirements for this scheduling system. You have arranged appointments for interviews with three key members of the customer's staff, and are now preparing interview questions. Which of the questions below are appropriate interview questions for the requirements elicitation? (2 Points)

- A. What are the most important technical terms for the application and how are they defined?
- B. If the delivery deadline is not met, is a contract penalty to be paid?
- C. What data quantities / data rates are to be processed?
- D. When is the installation of the completed system to be started?

Correct Answer: C

QUESTION 4

Which two statements are correct with regard to the introduction of a requirements engineering tool? (2 Points)

- A. The introduction of a tool defines the future requirements engineering approach
- B. Risks associated with the introduction can be identified through a pilot operation
- C. The requirements engineering processes must be clearly defined before introduction
- D. The license costs are generally the greatest cost block relating to the introduction of a requirements engineering tool

Correct Answer: CD

QUESTION 5

Within system development, conflicts continually arise between stakeholders with regard to the requirements. As a requirements engineer, how do you handle conflicts in projects best? (1 Point)

- A. You resolve the conflict with the best resolution technique available to you.
- B. You analyze the conflict, try to bring about a solution with a suitable technique and document relevant information about the conflict.
- C. You ignore the conflict since this is a matter for project management.
- D. In order to resolve such conflicts you escalate them via the escalation paths defined in the project.

Correct Answer: B
