QUESTION 1

Which network port requires an Ethernet connection to use the HP Agentless Management feature on an HP storeVirtual 4330?

- A. Blade Onboard Administrator
- B. HP iLO management processor
- C. Onboard NIC1
- D. Integrity Management Processor

Correct Answer: B

QUESTION 2

You have been asked to design a solution that allows a customer to migrate from HP 3PAR F400 that is at capacity and nearly three years old. The customer is evaluating the new HP 3PAR StoreServ7400. One of the major considerations is online data migration.

Which HP 3PAR StoreServ functionality should you recommend to perform this migration?

- A. OnlineExport
- B. Peer Persistence
- C. Remote Copy
- D. Peer Motion

Correct Answer: D

QUESTION 3

You are asked to design a backup, recovery, and archive (BURA) solution for a customer. After the classification and categorization of the data, it is determined that legacy data will be stored on HP StoreAll and HP StoreEver, and operational data will be stored on HP StoreOnce.

What should you suggest for critical data storage that will enable the customer almost instantaneous restore in the event of failures?

- A. HP 3PAR StoreServ Recovery Manager
- B. HP StoreVirtual Application Integrated Snapshots
- C. HP MSA Remote Snap Software
- D. HP Data Protector Catalyst

Correct Answer: B

QUESTION 4

Scenario: The consultant is reviewing a customer's storage and backup infrastructure design for a possible upgrade new solution design. The existing environment consists of several HP DL servers connected to HP 24 SAN Switches. An HP Enterprise Virtual Array 4400 is used as storage for their virtualized servers. Some HP D2700 Storage Systems are direct connected to their Windows servers. An HP StoreOnce D2D 4106fc Backup System is used as primary backup target. Once a week backup data copied to an HP MSL4048 as secondary backup target using HP Data Protector (DP) 6.1.

During the planning phase the consultant has to propose whether the existing solution can be upgraded or a new solution design is required.

Refer to the scenario:

Which resource can be used to gather average performance data of the secondary backup target?

- A. HP Performance Assessment Tool
- B. HP Media Operations
- C. HP Read Data
- D. HP Library and Tape Tools

Correct Answer: D

QUESTION 5

What enables HP StoreEasy Storage to replicate only changed file blocks instead of the entire file?

- A. File Screening Management
- B. Cyclical Redundancy Check
- C. File Classification Infrastructure
- D. Remote Differential Compression

Correct Answer: D
