## QUESTION 1

A Steelhead administrator has recently decided to troubleshoot a TCP connection. He wants to find out if the Steelhead is adding a probe into the TCP SYN packets. For some reason, he is not being successful on his attempts.

What could be the reason? (Select 2)

- A. He is collecting traffic using tcpdump on the Steelhead LAN interface
- B. He is collecting traffic using tcpdump on the Steelhead WAN interface
- C. He never started a TCP connection, after he started tcpdump
- D. He started a TCP connection, after he started tcpdump

Correct Answer: AC

---

## QUESTION 2

When upgrading from a Steelhead 5050 appliance to a Steelhead 6050 appliance what can be migrated to the new appliance? (Select 2)

- A. Datastore
- B. Licenses
- C. Network configuration
- D. Optimization configurations
- E. Serial numbers

Correct Answer: CD

---

## QUESTION 3

You plan to downgrade a SteelHead from RiOS v9.0.1 (Apr 17 2015) to 8.6.3 (Aug 7 2015). The appliance was previously running v8.6.3 but was factory reset after the upgrade. Will this be successful?

- A. No, there is no longer a configuration file for v8.6.3
- B. Yes, the current v9.0.1 configuration file will be migrated
- C. Yes, the old configuration file from v8.6.3 will be loaded
- D. No, it is not possible to downgrade RiOS

Correct Answer: A

---

## QUESTION 4

A customer with no Steelhead appliances currently deployed wants to test Steelhead Mobile on a client that connects to corporate through a VPN over the Internet. The customer has the requirement that there be no network disruptions during the initial testing phase. Which of the following would work?

- A. Place a Steelhead appliance in-path behind the WAN router and have the Steelhead Mobile client use auto-discovery rules
- B. Use server-side out-of-path with a Steelhead and use fixed-target rules on the Steelhead Mobile clients
- C. Place a Steelhead in-path directly behind the VPN gateway and use auto-discovery on the Steelhead Mobile client
- D. Use server-side out-of-path with the Steelhead Mobile Controller and use a fixed-target on the Steelhead Mobile client
- E. Place the Steelhead Mobile Controller in-path directly behind the VPN gateway and use auto-discovery on the Steelhead Mobile client

Correct Answer: B

---

## QUESTION 5

Which of the following best describes the way a CMC appliance policy can be created?

- A. By creating new policies through the CLI
- B. Policies can be created either manually, via a configuration fetch from a Steelhead appliance, or by copying another policy
- C. By copying from a text file
- D. Policies can only be created manually

Correct Answer: B
