---

## QUESTION 3

Which two statements are true about Fn Context?

- A. You cannot configure multiple contexts for your function development.
- B. Fn Context stores the information related to API URL and registry.
- C. The default context is created during the first run of the Fn CLI.
- D. Fn Context does not support local development.

Correct Answer: BC

---

## QUESTION 4

You can use the backup and restore capabilities of Oracle Cloud Infrastructure Block Volumes to return your Oracle WebLogic Server for Oracle Cloud Infrastructure domain to a specific state, or to recover from a failure.

Which statement is wrong?

- A. You can restore the data only from full backup and not from incremental backup.
- B. When users create a backup from a volume or restore a volume from a backup, the volume and backup don't have to be in the same compartment.
- C. You should use the latest available Block Volume backup for creating the Block Volume, so that all the latest WLS config and data are available for restore.
- D. You can either take an immediate backup of the volumes, or you can configure a backup policy that takes a future backup according to the policy's schedule.

Correct Answer: C

---

#### QUESTION 5

As the team lead of a mobile project being developed using Oracle Mobile Hub, you want to:
