QUESTION 1

A furniture retailer wants its online buyers to first choose their underlying need, which will then direct them to the related list of accessories and product parts of the configurable furniture product. The retailer intends to do this by presenting standard questions to the online buyers on their needs, and then presenting the related list of accessories and parts through dynamic user interfaces.

What step is required to enable this feature?

- A. Add a supplemental structure to the root node of the item-based model in the workspace area of the Configurator.
- B. Add a supplemental structure to the option classes of the item-based model in the workspace area of the Configurator.
- C. Add a supplemental structure to the root node of the item-based model in Fusion Product Hub, and then import it into the Configurator.
- D. Add a supplemental structure at the option class level for each model product in Fusion Product Hub, and then import it into the Configurator.

Correct Answer: A

QUESTION 2

Your company has a single global installation that contains Oracle Cloud Product Management, Oracle Cloud Trading Community Model, and Cloud Order Management. It has all the execution systems implemented in tandem with Global

Order Promising. The Master data elements have also been migrated to their respective areas. The next step is to run the data collection program to load the planning data repository.

Which five data elements will the collection program load into the planning data repository? (Choose five.)

- A. Currencies
- B. Shipping methods
- C. Suppliers
- D. Customers
- E. Items
- F. Cross-referenced data
- G. Calendars

Correct Answer: CDEFG

QUESTION 3

- A. Manage Orchestration Status Values
- B. Manage Task Status Condition
- C. Manage Status Values
- D. Manage Orchestration Status

Correct Answer: BD

QUESTION 5

Your company, which is a global major in farming equipment, has products ranging from make-to-stock fast moving items, assembled-on-demand items, and complex configurable items with manufacturing plants and distribution centers spread across the US, Europe, and China. The company is deploying Oracle Cloud Order Management, and wants to evaluate the different promising modes that are possible through cloud Global Order Promising for its products. Which three promising modes are possible through GOP for the company's products? (Choose three.)

- A. lead times
- B. infinite availability
- C. global availability
- D. zone-based availability
- E. supply chain availability

Correct Answer: ABE

<https://docs.oracle.com/en/cloud/saas/supply-chain-management/r13-update17d/fascp/manage-order-promising-rules.html#FASCP1127104> ATP Rule Promising Modes: Explained The promising mode of an available-to-promise (ATP) rule determines which set of attributes the order promising logic evaluates when determining ATP results. When creating an ATP rule on the Manage ATP Rules page, the first thing that you must specify is which of the three promising modes is applicable to the ATP rule. These are the three promising modes: Supply chain availability search Lead time based Infinite availability based
