QUESTION 1

You have an on-premises non-TDE-encrypted Linux 19c container database (CDB) that is already being regularly backed up to Oracle Cloud Infrastructure (OCI) Object Storage via the Database Backup Cloud Service. You plan on using Recovery Manager (RMAN) to migrate it to Database Cloud Service. What is the valid strategy to migrate?

- A. Create a new OCI DB Service instance and use the "instantiatefrom backup" option in the console. This will automatically take care of the encryption.
- B. Create a new OCI DB Service instance, delete the existing database, and use the DBaaS tooling to configure the DB Cloud Backup Module to point to the existing bucket, and then restore the backup by using the console.
- C. Create a new OCI DB Service Instance, copy the backup data from the bucket to the FRA, and then use the console to perform a DB restore.
- D. Create a new DB Service instance, delete the existing database, manually install the DB Cloud Backup Module pointing it to the backed where the on-premises backups are located, and perform a completed RMAN RESTORE AS encryption operation.

Correct Answer: D

QUESTION 2

Which migration method gives you the least downtime?

- A. Data Guard
- B. RMAN point-in-time recovery
- C. Transportable Tablespaces
- D. Data pump

Correct Answer: A

QUESTION 3

Which type of autonomous database will you create for decision support systems that run fast queries over large volumes of data?

- A. Autonomous Transaction Processing
- B. Autonomous JSON Database
- C. Autonomous Data Warehouse
- D. Autonomous APEX Service

Correct Answer: C

QUESTION 4

Which are THREE target database prerequisites for database cloud migration with Oracle Zero Downtime Migration? (Choose all correct answers)

- A. Transparent Data Encryption (TDE) must be enabled.
- B. The database can be created only after migration has begun.
- C. The database db_name should be the same as the source database.
- D. The TDE wallet status must be open.
- E. The TDE wallet status must be closed.

Correct Answer: ACD

QUESTION 5

Which four Oracle database version are supported for source databases when migrating with Oracle Zero Downtime Migration? (Choose all correct answers)

- A. Oracle Database 11g Release 2 (11.2.0.3)
- B. Oracle Database 10 g Release 2
- C. Oracle Database 12c Release 2 (12.2.0.1)
- D. Oracle Database 11g Release 2 (11.2.0.4)
- E. Oracle Database 19
- F. Oracle Database 12c Release 1 (12.1.0.2)

Correct Answer: ADEF
