### QUESTION 1

You are developing a customer information application for a pay television company. The customer's home telephone number is used as the account number for the customer. Clerks must be able to update the telephone number in case of changes or data entry errors.

A data entry clerk will typically open several forms from the Customers form that are synchronized with the currently selected customer using a global variable containing the telephone number.

Although you also need to modify the other forms, what two triggers should you code in the Customers form to keep the forms synchronized in case the data entry clerk updates the telephone number or selects a different customer? (Choose two.)

- A. Pre-Query
- B. Post-Query
- C. Key-Next-Record
- D. When-New-Record-Instance
- E. When-Validate-Item for the phone number item
- F. When-New-Item-Instance for the phone number item

Correct Answer: DE

---

### QUESTION 2

You have an image item in the Employees form to display an employee photograph. The image item has default values for its properties. You are trying to decide where to place some code to manipulate the image item. If you place the code in a When-Image-Activated trigger, when will the code be executed?

- A. when the user clicks the image item
- B. when the user double-clicks the image item
- C. when the image item is first displayed on the canvas
- D. when the image item is populated with an image, either programmatically or by a query

Correct Answer: B

---

### QUESTION 3

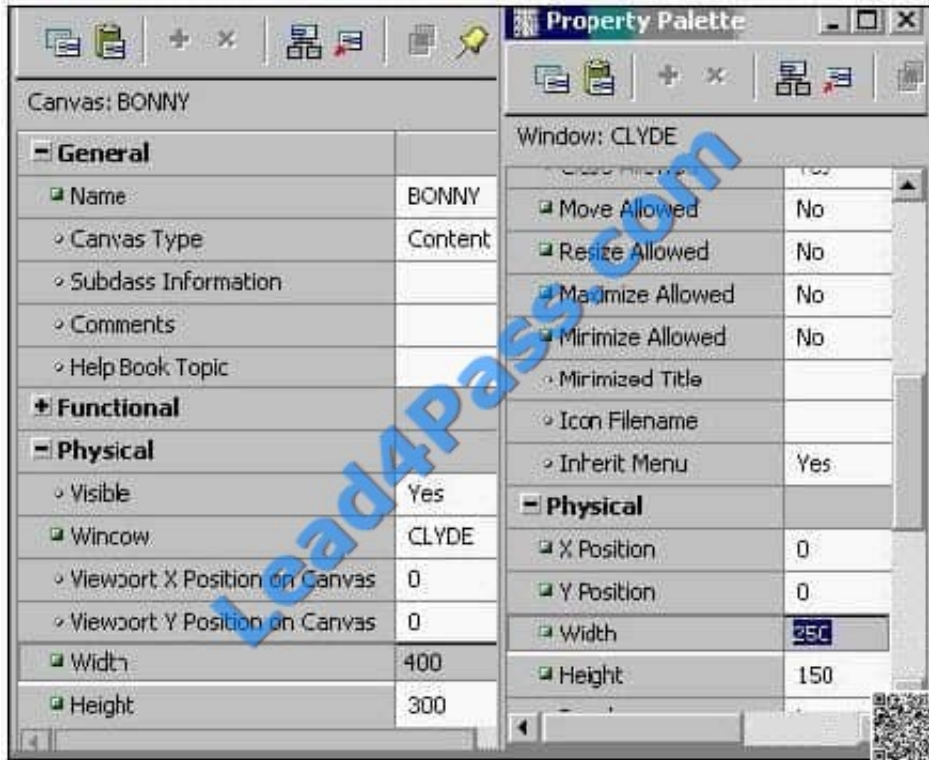

View the Exhibit and examine the Property Palettes of the BONNY canvas and the CLYDE window. The requirements of the application specify that the CLYDE window should not be resizable.

The form contains two items, both 50 points wide by 15 points high, which are associated with the canvas.

The first item is a text item; the X Position property is 30, and the Y Position property is 40. The second item is a display item; the X Position property is 150, and the Y Position property is 250.

What are two ways to allow the user to view the display item at run time? (Choose two.)

- A. At run time, with the cursor in the text item, press the Tab key.
- B. Define CLYDE as a modal window and display it with a horizontal scroll bar.
- C. Define CLYDE as a modeless window and display it with a horizontal scroll bar.
- D. Define CLYDE as a dialog window and display it with a horizontal scroll bar.
- E. Define CLYDE as a document window and display it with a vertical scroll bar.
- F. Define CLYDE as a modeless window and display it with a vertical scroll bar.

Correct Answer: EF

#### QUESTION 4

You write a form in which there are two text items (FIELD1 and FIELD2) and a button (BTN1) arranged in the following navigation sequence:

FIELD1, BTN1, FIELD2

With the focus in FIELD1, the user presses the [Next Item] key and encounters a navigation trap, in which the cursor is unable to advance to the next item and cannot return to FIELD1.

Which three conditions can combine to produce such a navigation trap? (Choose three.)

- A. FIELD1 has a Post-Text-Item trigger that fails.
- B. FIELD1 has a Pre-Text-Item trigger that fails.
- C. FIELD1 has a When-New-Item-Instance trigger that fails.
- D. FIELD2 has a Post-Text-Item trigger that fails.
- E. FIELD2 has a Pre-Text-Item trigger that fails.
- F. FIELD2 has a When-New-Item-Instance trigger that fails.
- G. The Keyboard Navigable property of BTN1 is set to No.
- H. The Keyboard Navigable property of BTN1 is set to Yes.

Correct Answer: BEG

---

## QUESTION 5

View the Exhibit.

You are developing a form for a family-oriented video store. The form will run in query-only mode in a customer kiosk to show information about movies that are available to rent. The Rating item in the Movies block of the form shown in the

upper portion of the exhibit displays the rating of the movie: G, PG, R, or X. Your customers are not interested in all these values, but they do want to see if the film is rated G to indicate that it is suitable for the whole family.

You decide to change the item to a check box to be displayed as shown in the lower portion of the exhibit.

You want users to be able to query any movies, but only those with a G rating will have the check box selected.

You change the item type of the Rating item to Checkbox and set its Label, Value When Checked (G), and Prompt properties. However, when you run the form to test it and execute an unrestricted query, only those movies with a rating of G

are displayed.

What do you need to change so that all movies are returned by the query and the check box properly shows the "For the Whole Family" rating?

**Original Display:**

Movie Id	4
Movie Name	Snow White
Rating	G

**Desired Display:**

Movie Id	4
Movie Name	Snow White
	<input checked="" type="checkbox"/> For the Whole Family

- A. Set the Initial Value property of the Rating item to G.
- B. Set the Value When Unchecked property of the Rating item to null.
- C. Set the Checkbox Mapping of Other Values property of the Rating item to Checked.
- D. Set the Checkbox Mapping of Other Values property of the Rating item to Unchecked.
- E. Set the Update Allowed, Insert Allowed, and Delete Allowed Properties of the Movies block to No.
- F. Change the item type. You cannot use a check box for this application because there are more than two possible values for the item.

Correct Answer: D
