QUESTION 1

Click the Task button.

Place each code snippet where it belongs.

Select and Place:

Place each code snippet where it belongs.

```

10. public class ExampleMIDlet extends MIDlet {
11. // ...
20. public  () {
21.     
22. }
23. public void  () {
24.     
25. }
26. public void  () {
27.     // Pause threads
28.     
29.      ();
30. }
31. public void  (boolean arg) {
32.     
33.     // Release resources
34.      ();
35. }
36. }
    
```

Correct Answer:

Place each code snippet where it belongs.

```

10. public class ExampleMIDlet extends MIDlet {
11. // ...
20. public ExampleMIDlet () {
21. // Do as little as possible
22. }
23. public void startApp () {
24. // Acquire resources
25. }
26. public void pauseApp () {
27. // Pause threads
28. // Temporarily release resources
29. notifyPaused ();
30. }
31. public void destroyApp (boolean arg) {
32. // Stop threads
33. // Release resources
34. notifyDestroyed ();
35. }
36. }
    
```

QUESTION 2

Which three statements are true regarding the handling of wireless connections? (Choose three.)

- A. Network connections should never be performed on a separate thread, so problems can be handled quickly.
- B. Performing network operations on the same thread used by the display is likely to block refreshes of the display until the network operations complete.
- C. The connection could unexpectedly terminate while processing the input or output streams.
- D. Devices can only support one HttpURLConnection at a time; therefore, network access from multiple threads must be serialized.
- E. A network connection could interfere with other services on the device, such as the ability to receive phone calls or SMS on a phone.

Correct Answer: BCE

QUESTION 3

Due to possible performance consequences, the MIDP 2.0 specification urges caution when creating certain types of record store enumerations. Which is identified in the specification as having the greatest probability of resulting in poor response time?

- A. using a comparator
- B. setting the keepUpdated argument to true

C. using a filter

D. using a filter and a comparator together

Correct Answer: B

QUESTION 4

Which three are top level interfaces in the javax.wireless.messaging package? (Choose three.)

A. MessageListener

B. MessageHandler

C. MessageConnection

D. Datagram

E. Message

F. Connector

Correct Answer: ACE

QUESTION 5

Which two are true when deleting a record store? (Choose two.)

A. If the record store is open, an exception will be thrown.

B. For any registered listener of the record store, recordDeleted() will be called.

C. The record store must be open prior to calling deleteRecordStore().

D. The record store must be closed prior to calling deleteRecordStore().

Correct Answer: AD
