The architecture team is debating whether such reports should be run onthe OLTP database or in a separate data mart. The DBA Manager does not want to add anymore admin responsibility to the team and is looking for a database option that\\'s low to zero maintenance, but meets their strict performance requirements as well.

Which Oracle Cloud Infrastructure database service is appropriate for this scenario?

A. Since the application needs to be highly available, it should to be deployed on a Kubernetes Cluster.

B. ADW since operational reporting is a higher priority in this scenario.

C. It is best to build a separate data warehouse, and move the OLTP data on a nightly basis.

D. ATP. Using \\'tpurgent\\' and \\'high\\' TNS services to separate connection types.

Correct Answer: D

Autonomous Transaction Processing provides all of theperformance of the market leading Oracle Database in an environment that is tuned and optimized to meet the demands of a variety of applications, including: mission-critical transaction processing, mixed transactions and analytics, loT, and JSON document store.

As a service Autonomous Transaction Processing does not require database administration. With Autonomous Transaction Processing you do not need to configure or manage any hardware, or install any software. Autonomous Transaction Processing handles creating the database, backing up the database, patching and upgrading the database, and growing or shrinking the database.

QUESTION 4

While Autonomous Transaction Processing and Autonomous Data Warehouse use the same Oracle database, which statementis true about the workloads?

A. Autonomous Transaction Processing memory usage optimizes workloads for parallel joins and aggregations.

B. Autonomous Data Warehouse workloads are optimized for mixed workloads.

C. Autonomous Transaction Processing workloads are optimized for data warehouse, data mart, and data lake.

D. Data that is bulk loaded, by default, uses the row format in Autonomous Transaction Processing where Autonomous Data Warehouse data format is columnar.
