QUESTION 1

Stop Autonomous Database

Describes the steps to stop an Autonomous Database instance.

Perform the following prerequisite steps as necessary:

- Open the Oracle Cloud Infrastructure Console by clicking the  next to Oracle Cloud.
- From the Oracle Cloud Infrastructure left navigation menu click **Oracle Database** and then, depending on your workload click one of: **Autonomous Data Warehouse**, **Autonomous JSON Database**, or **Autonomous Transaction Processing**.
- On the Autonomous Databases page select an Autonomous Database from the links under the **Display Name** column.

1. On the **Details** page, from the **More Actions** drop-down list, select **Stop**.
2. Click **Stop** to confirm.

When concurrent operations such as scaling or creating a manual backup are active, the confirmation also confirms either pausing or canceling the concurrent operation. See [Concurrent Operations on Autonomous Database](#) for more information.

Note: When an Autonomous Database instance is stopped, the following details apply:

- Tools are no longer able to connect to a stopped instance.
- Autonomous Database in-flight transactions and queries are stopped.
- Autonomous Database CPU billing is halted.

A BusinessAnalyst joined in your organization and wanted to explore the database tools. Which statement provides access to data tools page for business analyst.
