Daisy chaining PrecisionHD Camera 1080p12x

A single daisy chain with PrecisionHD 1080p12x cameras can have:

- Three cameras when using a Codec C60
- Seven cameras when using a Codec C90

Locate the extra camera and power connectors:

- **Power:** The first camera in the chain is powered up from the codec by a **VISCA** camera control cable. Additional cameras must use the 12V DC Power in.
- **Extra camera cable:** The daisy chained cameras are connected by a **VISCA** Extra Camera cable (maximum length 20 m / 65.6 ft) between the Extra Camera In and Codec Control In sockets.
- **HDMI and HD-SDI:** The HDMI and HD-SDI outputs can be used simultaneously on the same camera.

NOTE: Only the first camera's software is automatically updated in a daisy chain. To update the other cameras you have to connect them directly to the codec.

Example:
