QUESTION 1

What is the function of the Symantec Mail Security 8300 default Email Virus Policy?

- A. checks for viruses, mass-mailing worms, spyware, adware, and suspicious attachments
- B. checks for viruses, mass-mailing worms, spam, and suspected spam
- C. checks for internal and external mass-mailings and suspicious attachments
- D. checks for spyware, adware, and all message attributes

Correct Answer: A

QUESTION 2

Which command attempts to repair a missing disk access record by finding the name of the device in the private region and matching it to an existing disk media record?

- A. vxdisk
- B. vxdctl
- C. vxreattach
- D. vxrecover

Correct Answer: C

QUESTION 3

Which statement is true about Content Compliance policies?

- A. Available linked compound conditions include AND, OR, XOR, and NOT.
- B. They are evaluated in the order listed on the main page of the Compliance tab.
- C. There is a set limit to the number of conditions per compliance policy.
- D. The order of conditions in a filter is important when a filter matches a message.

Correct Answer: B

QUESTION 4

Why is FastResync enabled automatically for volumes created on thin LUNs?

- A. Volumes based on thin LUNs are more likely to require resync than volumes based on thick LUNs.

B. To ensure thin LUNs remain thin should resync be required.

C. To ensure data written to volumes based on thin LUNs is persistent.

D. Resync for volumes based on thin LUNs is slower than resync for volumes based on thick LUNs and FastResync bridges this performance gap.

Correct Answer: B

QUESTION 5

What are the key components of a group policy in Symantec Mail Security 8300?

A. a list of sender groups, sender authentication profiles, and scan settings for an organization

B. disposition configuration, user email addresses, and quarantine settings

C. an LDAP source and a local domain

D. conditions, a set of actions, and groups to whom the policy applies

Correct Answer: D
