-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

Which three options are hardening techniques for Cisco IOS routers? (Choose three.)

- A. limiting access to infrastructure with access control lists
- B. enabling service password recovery
- C. using SSH whenever possible
- D. encrypting the service password
- E. using Telnet whenever possible
- F. enabling DHCP snooping

Correct Answer: ACD

QUESTION 2

Which command limits a router to be administrated only via SSH?

- A. transport input ssh
- B. transport deny telnet
- C. transport ssh
- D. transport telnet

Correct Answer: A

QUESTION 3

Which statement describes the correct steps to enable Botnet Traffic Filtering on a Cisco ASA version 9.0 transparent-mode firewall with an active Botnet Traffic Filtering license?

- A. Enable DNS snooping, traffic classification, and actions.
- B. Botnet Traffic Filtering is not supported in transparent mode.
- C. Enable the use of the dynamic database, enable DNS snooping, traffic classification, and actions.
- D. Enable the use of dynamic database, enable traffic classification and actions.

Correct Answer: C

QUESTION 4

Choose two correct statements about private-vlan.

- A. Interface that is assigned to primary-vlan ID (access mode) can communicate with interface with secondary vlan ID that belongs to same primary-vlan (same switch)
- B. Interface that is assigned to community vlan can communicate with interface in the same secondary vlan but it is also configured as protected (same switch)
- C. You have to configure dhcp snooping for both primary and secondary VLANs
- D. You have to configure DAI only for primary vlan
- E. You cannot combine private-vlan feature with protected ports ?

Correct Answer: DE

You can enable DHCP snooping on private VLANs. When you enable DHCP snooping on the primary VLAN, it is propagated to the secondary VLANs. If you configure DHCP snooping on a secondary VLAN, the configuration does not take

effect if the primary VLAN is already configured. The same statement is true about DAI.

A private-VLAN port cannot be a secure port and should not be configured as a protected port.

QUESTION 5

Host cannot communicate with server. Traffic goes through ASA. Which cli command can confirm if ASA is blocking traffic or not?

- A. Capture

Correct Answer: A
