QUESTION 1

You are designing a SharePoint 2010 application.You need to ensure that a custom list named Phone Numbers is automatically created and added to the site whenever a new Team Site is created.

Which approach should you recommend?

A. Create a feature that defines a Phone Numbers list template. Then activate the feature on the team site.

B. Create a feature that defines a Phone Numbers list template. Then use feature stapling to associate the feature with the site definition of the team site.

C. Create the custom Phone Numbers ListTemplate element and add the ListTemplate element to the onet.xml file of the team site.

D. Create the custom fields, views, and other specifications for the Phone Numbers list definition and add them to the schema.xml file.

Correct Answer: B

QUESTION 2

An application will be deployed in a SharePoint 2010 server farm that is managed by department- level site collection administrators.You need to design this application to meet all the following requirements:

.The application must contain a custom Web Part that accesses the object model at the farm level.

.The application must be available anywhere in the farm as more departments require the functionality.

.The site collection administrator in each department must be able to activate the application without the help of the farm administrator.

.The level of access to the SharePoint 2010 object model must be limited.

Which approach should you recommend?

A. Create the Web Part as part of a feature in a sandboxed solution. Then deploy it with a farm-level scope.

B. Create the Web Part as part of a feature in a sandboxed solution. Then deploy it by assigning a resource quota at the site collection level.

C. Create the Web Part as part of a feature. Then deploy it to the bin directory of the Web application of each department. Specify and deploy a Custom Access Security policy defining the security limitations of the Web Part.

D. Create the Web Part as part of a feature. Then deploy it to the bin directory of the Web application of each department. Delegate authority to modify the security in the Web application web.config file to the site collection administrator of each department.

Correct Answer: C

QUESTION 3

You are designing a SharePoint 2010 site.You need to design the site to meet all the following requirements:

.Your business requires a consistent structure to manage sales proposal documents across all account teams.

.The sales director must ensure that all sales documents conform to the same template.

.All sales proposals must be reviewed and approved by the sales manager.

.Every site must be created with a document library, a list of the account team members, and the account status.

Which approach should you recommend?

A. Design a site template with a standard list of account team members and a shared document library to hold the proposal documents.

B. Design a proposal content type to store proposal document metadata and a shared document library to hold the proposal documents.

C. Design a proposal content type to include required metadata information about the proposal documents. Also design a site template with a standard document library and account team members list for consistency across all account teams.

D. Design a content type that uses a Microsoft Word template for proposal documents. The content type includes required metadata. Also design a site template with a customized document library and list for consistency across all account teams.

Correct Answer: D

QUESTION 4

You are designing a SharePoint 2010 application.You need to make sure the application aggregates list items from multiple site collections into a single view. Which object should you recommend to accomplish this?

A. SPListItemCollection

B. SPSiteDataQuery

C. SPQuery

D. KeywordQuery

Correct Answer: D

QUESTION 5

You are designing a SharePoint 2010 application. The code makes numerous calls to SPSite and SPWeb objects.The system and application performance is poor in the test environment. There is also a high level of memory use for IIS worker processes.You need to ensure that the application performance and high memory use issues are addressed.

Which approach should you recommend?

A. Use the Resource Throttling settings in Central Administration to increase site resource thresholds.

B. Use the SPSite and SPWeb SharePoint 2010 PowerShell cmdlets.

C. Ensure that the Dispose method of SPSite and SPWeb is called throughout the code.

D. Ensure that the Close method of SPSite and SPWeb is called throughout the code.

Correct Answer: C
