QUESTION 1

You are designing a SharePoint 2010 site.You need to design the site to meet all the following requirements:

.Your business requires a consistent structure to manage sales proposal documents across all account teams.

.The sales director must ensure that all sales documents conform to the same template.

.All sales proposals must be reviewed and approved by the sales manager.

.Every site must be created with a document library, a list of the account team members, and the account status.

Which approach should you recommend?

A. Design a site template with a standard list of account team members and a shared document library to hold the proposal documents.

B. Design a proposal content type to store proposal document metadata and a shared document library to hold the proposal documents.

C. Design a proposal content type to include required metadata information about the proposal documents. Also design a site template with a standard document library and account team members list for consistency across all account teams.

D. Design a content type that uses a Microsoft Word template for proposal documents. The content type includes required metadata. Also design a site template with a customized document library and list for consistency across all account teams.

Correct Answer: D

QUESTION 2

You are designing a SharePoint 2010 farm implementation that will include an extranet zone that will employ forms-based authentication (FBA).The plan must:

.Specify how farm administrators will manage modifications to the configuration settings for the FBA within each Web application.

.Support granular modifications to the individual Web applications.

.Include a process to apply the modifications to the SharePoint configuration database.

.Specify a process to deploy the changes throughout the server farm by propagating the changes to all Web front-end servers.

You need to create a software configuration management plan for the farm that meets all these requirements.

Which approach should your plan recommend?

A. Create a feature that contains code to read, modify, and save the configuration setting for the SPWebApplication object for each Web application. Save the settings in the hierarchical object store by creating a SPPersistedObject class

to store the configuration.

B. Create a feature that contains code to modify the configuration settings to the web.config file for each Web application. Then propagate the changes programmatically by implementing the SPWebConfigModification class.

C. Build a custom list for each Web application that stores the required configuration information. Create a custom workflow that uses the Set Field in Current Item action to synchronize the settings in the list with the configuration database and the Web servers.

D. Build the required changes declaratively by creating an XML extension containing the settings needed. Deploy the file to the 14\Config directory. Then use the Stsadm copyappbincontent command to merge these changes with the existing web.config file.

Correct Answer: B

QUESTION 3

You are designing a SharePoint 2010 application. You are also designing a Microsoft .NET Framework client application that will interact with the SharePoint application.You need to design the client application to create, update, and delete lists.

Which approach should you recommend?

A. Use the SP.UI.UIUtility class in the client application.

B. Use SharePoint 2010 Web services in the client application.

C. Use the SharePoint Foundation 2010 managed client object model in the client application.

D. Create a Business Connectivity Services (BCS) package that manages tasks between the client and server applications.

Correct Answer: C

QUESTION 4

You are designing a SharePoint 2010 application that allows users to enter contact information into a form.You need to design the application so that it displays a dialog box prompting users to validate their contact information before the data is saved.

Which approach should you recommend?

A. Create an application page that calls the SP.UI.ModalDialog class.

B. Create an application page that calls the SP.UI.PopoutMenu class.

C. Create a Web Part that calls the MessageBox class.

D. Create a visual Web Part that calls the SP.UI.PopoutMenu class.

Correct Answer: A

QUESTION 5

You are designing a SharePoint 2010 application.You have a requirement to allow access to a Microsoft Windows .NET Framework assembly across multiple Web applications in a farm. An assembly element has been added to the solution manifest (manifest.xml).You need to ensure that the deployment of the assembly meets the requirements.

Which approach should you recommend?

A. Specify a DeploymentTarget of GlobalAssemblyCache.

B. Specify a DeploymentTarget of WebApplication.

C. Specify a Location of GlobalAssemblyCache.

D. Specify a Location of WebApplication.

Correct Answer: A
