QUESTION 1

You are designing a SharePoint 2010 solution.You need to design the solution to meet the following requirements:

.All sites must have a consistent structure when initially created.

.All sites must include a document library that contains Word documents with searchable properties.

.Site users must be able to generate a spreadsheet detailing the properties of the document library contents.

Which approach should you recommend?

A. Create a feature to create the required site structure programmatically. Create a content type for the document library. Create a custom workflow for the document library to allow users to generate the spreadsheet.

B. Create a feature to create the required site structure programmatically. Use feature stapling to associate the feature with all site definitions. Create a custom action for the standard document library to allow users to generate the spreadsheet.

C. Create a custom site definition for the sites and allow only that site definition to be used. Create a content type for the document library. Create a custom action for the document library to allow users to generate the spreadsheet.

D. Create a custom site definition for the sites and allow only that site definition to be used. Create a content type for the document library. Create a custom event receiver to allow users to generate the spreadsheet.
