QUESTION 1

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You represent a SAM partner.

A client must consolidate their IT departments into a single business unit. The client was previously assessed in the Microsoft SAM Optimization Model (SOM) key competencies and assigned a SAM maturity level.

The client reclaims unused software licenses from all departments.

You need to ensure that the client progresses to the next SOM level in the Retirement Process key competency.

What should you do?

- A. Purchase software only from approved vendors.
- B. Publish software deployment reports to stakeholders.
- C. Use information provided by a software publisher.
- D. Use software metadata generated by the client.
- E. Deploy only approved software.
- F. Formulate a retirement process.
- G. Create an inventory of deployed assets.
- H. Maintain updated records of deployed assets.

Correct Answer: H

QUESTION 2

You are performing a SAM assessment for an organization that manufactures automobile parts. The organization has the following locations:

The majority of the organization's users and computers are located at the Los Angeles location.

The IT department and SAM teams work at the corporate headquarters in Rome.

A primary datacenter in Sydney hosts server applications, including asset inventory tools and data.

The product distribution center is located in Tel Aviv.

You must visit one of the locations to collect all of the important data for the assessment.

You need to determine the best location to visit to most effectively collect information to perform the SAM assessment.

Which location should you visit?

- A. Tel Aviv
- B. Los Angeles
- C. Sydney
- D. Rome

Correct Answer: C

A primary datacenter in Sydney hosts server applications, including asset inventory tools and data.

QUESTION 3

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

An organization plans to collect software and hardware inventory information for computers and mobile devices that access internal resources.

The solution must meet the following requirements:

Specify whether Apple iOS or Android devices are jailbroken or rooted.

Minimize administrative effort

You need to collect the device data. What should you use?

- A. Microsoft Assessment and Planning Toolkit (MAP)
- B. Microsoft Deployment Toolkit (MDT)
- C. Microsoft Intune
- D. Microsoft License Advisor (MLA)
- E. Microsoft Security Compliance Manager (SCM)
- F. System Center Configuration Manager (ConfigMgr)
- G. System Center Operations Manager (OpsMgr)
- H. Microsoft Virtual Machine Manager (VMM)

Correct Answer: C

With compliance policies an Intune administrator can require: The device isn't jail-broken or rooted End users use a

password to access organizational data on mobile devices A minimum or maximum operating system version on the device The device to be at, or under a threat level

QUESTION 4

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You are performing a licensing audit for a small business.

You need to create a solution that meets the following requirements:

Collect software installation details for computers on the network.

Ensure that computers on the network do not have any additional agents installed.

Do not acquire any additional software licenses to perform data collection.

What should you use?

- A. Microsoft Assessment and Planning Toolkit (MAP)
- B. Microsoft Deployment Toolkit (MDT)
- C. Microsoft Intune
- D. Microsoft License Advisor
- E. Microsoft Security Compliance Manager (SCM)
- F. System Center Configuration Manager (ConfigMgr)
- G. System Center Operations Manager (OpsMgr)
- H. Microsoft Virtual Machine Manager (VMM)

Correct Answer: A

The MAP Toolkit is a FREE, agentless tool designed to simplify and streamline the IT infrastructure planning process across multiple scenarios through network-wide automated discovery and assessments.

The MAP Toolkit inventories computer hardware, software, and operating systems in small or large IT environments without needing to install software on the target computers.

QUESTION 5

You are a SAM partner. You plan to complete a Microsoft SAM Optimization Model (SOM) baseline review assessment

for a client. You need to identify the phase one responsibilities for both organizations.

Which action should each organization perform? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point

Hot Area:

Answer Area

Organization

Action

Partner

	▼
Identify the process, roles, and responsibilities for the assessment.	
Assemble records of deployed and licensed software.	
Review and validate the identified priorities.	
Prepare customized reports based on priorities.	

Client

	▼
Identify the process, roles, and responsibilities for the assessment.	
Assemble records of deployed and licensed software.	
Review and validate the identified priorities.	
Prepare customized reports based on priorities.	

Correct Answer:

Answer Area

Organization

Action

Partner

	▼
Identify the process, roles, and responsibilities for the assessment.	
Assemble records of deployed and licensed software.	
Review and validate the identified priorities.	
Prepare customized reports based on priorities.	

Client

	▼
Identify the process, roles, and responsibilities for the assessment.	
Assemble records of deployed and licensed software.	
Review and validate the identified priorities.	
Prepare customized reports based on priorities.
