QUESTION 1

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

An organization plans to collect hardware and software information from over 10,000 client computers and servers.

The data must be automatically updated every week.

You need to collect the data.

What should you use?

- A. Microsoft Assessment and Planning Toolkit (MAP)
- B. Microsoft Deployment Toolkit (MDT)
- C. Microsoft Intune
- D. Microsoft License Advisor (MLA)
- E. Microsoft Security Compliance Manager (SCM)
- F. System Center Configuration Manager (ConfigMgr)
- G. System Center Operations Manager (OpsMgr)
- H. Microsoft Virtual Machine Manager (WM)

Correct Answer: F

Configuration Manager can inventory hardware and software in your organization to help give you a view into what resources you have. With Configuration Manager, you can enable custom hardware inventory more easily and extend the inventory schema.

Configuration Manager maintenance tasks can be scheduled.

Incorrect Answers:

A: The MAP Toolkit inventories computer hardware, software, and operating systems in small or large IT environments without needing to install software on the target computers. However, it is not possible to schedule automated weekly updates.

C: Microsoft Intune provides mobile device management, mobile application management, and PC management capabilities from the cloud. Intune supports SAM policies by keeping corporate information secure while providing your employees with access to corporate applications, data, and resources from virtually anywhere on almost any device.

F: System Center Configuration Manager supports an ongoing SAM management program by providing a unified management console with an automated set of administrative tools to deploy software, protect data, monitor health, and enforce compliance across all devices in an organization.

QUESTION 2

A software company is being assessed by a SAM partner.

The SAM partner must indicate how the company can optimize their on-premises software assets.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
The SAM partner needs to know which software is being used.	<input type="radio"/>	<input type="radio"/>
The SAM partner to know future business requirements.	<input type="radio"/>	<input type="radio"/>
The SAM partner needs to know how the software is being used.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statement	Yes	No
The SAM partner needs to know which software is being used.	<input checked="" type="radio"/>	<input type="radio"/>
The SAM partner to know future business requirements.	<input checked="" type="radio"/>	<input type="radio"/>
The SAM partner needs to know how the software is being used.	<input type="radio"/>	<input checked="" type="radio"/>

QUESTION 3

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may

be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You represent a SAM partner.

A client must consolidate their IT departments into a single business unit. The client was previously assessed in the Microsoft SAM Optimization Model (SOM) key competencies and assigned a SAM maturity level.

The client reclaims unused software licenses from all departments.

You need to ensure that the client progresses to the next SOM level in the Retirement Process key competency.

What should you do?

- A. Purchase software only from approved vendors.
- B. Publish software deployment reports to stakeholders.
- C. Use information provided by a software publisher.
- D. Use software metadata generated by the client.
- E. Deploy only approved software.
- F. Formulate a retirement process.
- G. Create an inventory of deployed assets.
- H. Maintain updated records of deployed assets.

Correct Answer: H

QUESTION 4

An organization is currently assessed at the Microsoft SAM Optimization Model (SOM) Basic maturity level for the License Entitlement Records key competency. The organization must progress to the Rationalized maturity level.

You need to ensure the organization reconciles its records.

Which value should you specify for each option? To answer, select the appropriate values in the answer area.

NOTE: Each correct selection is worth one point

Hot Area:

Answer Area

Option	Value
Record type	<input type="text"/> entitlement inventory procurement
Point of reconciliation	<input type="text"/> Operations Vendor IT Manager

Correct Answer:

Answer Area

Option	Value
Record type	<input type="text"/> entitlement inventory procurement
Point of reconciliation	<input type="text"/> Operations Vendor IT Manager

QUESTION 5

You are performing a SAM baseline review for an organization.

You need to review the processes for collecting data about hardware and software.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point

Hot Area:

Answer Area

Statement	Yes	No
The Established Deployment Position (EDP) report documents the software that has been deployed.	<input type="radio"/>	<input type="radio"/>
The Effective License Position (ELP) report documents the entitlements that are mapped to deployments.	<input type="radio"/>	<input type="radio"/>
The Licensing Optimization Recommendations Report provides details for cloud migration plans and security assessments.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statement	Yes	No
The Established Deployment Position (EDP) report documents the software that has been deployed.	<input checked="" type="radio"/>	<input type="radio"/>
The Effective License Position (ELP) report documents the entitlements that are mapped to deployments.	<input checked="" type="radio"/>	<input type="radio"/>
The Licensing Optimization Recommendations Report provides details for cloud migration plans and security assessments.	<input type="radio"/>	<input checked="" type="radio"/>
