QUESTION 1

A SteelHead in an Interceptor cluster notifies the Interceptor that it is under high pressure. How many credits are reduced for that SteelHead?

- A. 0%
- B. 10%
- C. 20%
- D. 30%
- E. 50%

Correct Answer: B

QUESTION 2

What types of operations can be observed under the Manage > Operation History page in the CMC Management Console? (Select 2)

- A. push
- B. link
- C. abort
- D. fetch

Correct Answer: AD

QUESTION 3

What is the command to return a Steelhead appliance back to factory defaults?

- A. (config) # restart factory reload
- B. (config) # reload factory
- C. (config) # restart clean
- D. (config) # reload clean empty
- E. (config) # reset factory reload

Correct Answer: E

QUESTION 4

What can be monitored via the CMC appliance? (Select 2)

- A. Currently logged in users to Steelhead appliances or the CMC appliance
- B. Command history per CMC appliance user
- C. Rogue Steelhead appliances on the network
- D. Current connections for an individual Steelhead appliance

Correct Answer: BD

QUESTION 5

You have a client and server using SMB2 signing. You have SMB optimization enabled on your SteelHeads, but SMB signing is not enabled on the server-side SteelHead. What is the effect on this on an SMB connection which the SteelHeads attempt to optimize?

- A. Any SMB2 connections between this client and server will be shown as optimized with protocol errors. No latency optimization or data reduction can be performed.
- B. SMB2 connections between this client and server, which are initiated at the client side will be fully optimized with latency reduction.
- C. Any SMB2 connections between this client and server will be optimized using data reduction only. No latency optimization will take place.
- D. Any SMB2 connections between this client and server will be optimized using latency optimization only No data reduction will take place.

Correct Answer: C
