**QUESTION 1**

Which of the following features allows you to change the shape of an object in an InDesign document?

- A. Pathfinder panel
- B. Preflight panel
- C. Stroke panel
- D. Swatches panel

Correct Answer: A

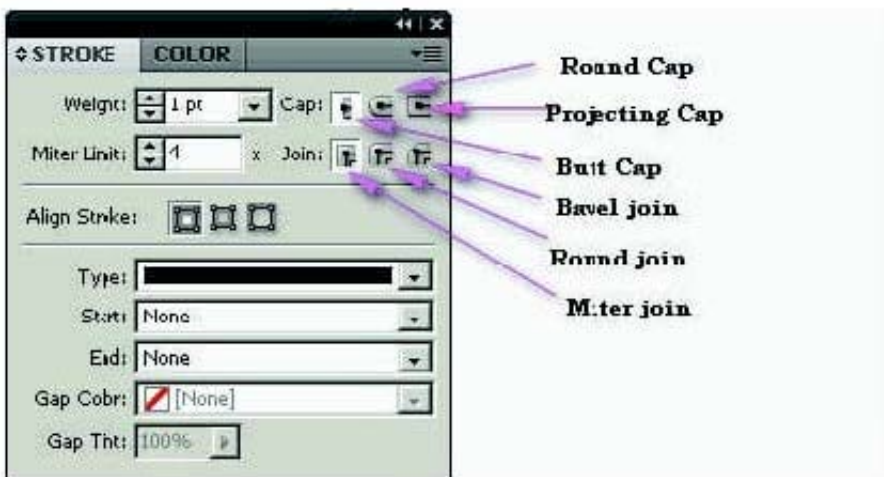

The Pathfinder panel is used to combine selected objects into new shapes. This panel can be opened by choosing Window > Object and Layout > Pathfinder.

Answer: B is incorrect. The Preflight panel is a feature of InDesign CS5 that warns of the problems that could prevent a document or book from printing or outputting as expected while a document is being edited. These problems include missing files or fonts, low-resolution images, overset text, and a number of other conditions. The preflight settings can be configured to define which conditions are detected. These preflight settings are stored in preflight profiles for easy reuse. To open the Preflight panel, choose Window > Output > Preflight, and double-click the Preflight icon at the bottom of the document window. The Preflight icon is green if no errors are detected or red if errors are detected. The Preflight panel is shown in the image below.

Answer: C is incorrect. The Stroke panel allows a user to modify the strokes applied to objects. The attributes of this panel affect how the path of an object looks. This panel can be opened by choosing Window > Stroke. Its keyboard shortcut is Ctrl+F10. It provides the following options to change the stroke of a selected object: Cap. It refers to the end of an open line. Following types of caps are available: Butt cap. It creates squared ends that abut (stop at) the endpoints. Round cap. It creates semi-circular ends that extend half the stroke width beyond the endpoints. Projecting cap. It creates squared ends that extend half the stroke width beyond the endpoints. This option makes the stroke weight extend evenly in all directions around the path. Join. It specifies the appearance of the stroke at corner points. Following types of joins are available. Miter join. It creates pointed corners that extend beyond the endpoint when the miter's length is within the miter limit. Round join. It creates rounded corners that extend half the stroke width beyond the endpoints. Bevel join. It creates squared corners that abut the endpoints.

Stroke panel

Answer: D is incorrect. The Swatches panel stores colors. It is used to import, export, delete, and modify the color

palette. Besides, a user can store custom colors in the Swatches panel. To add a color in the Swatches panel, move the cursor to the empty area of the Swatches panel (the cursor will change into the paint bucket) and click. To access the Swatches panel, select Window > Swatches.

## QUESTION 2

You are creating a document in InDesign CS5. When you place an InDesign file and select Show Import Options in the Place dialog box, a dialog box appears.

Which of the following options in the dialog box specifies how much of the page, or pages to place; the page itself, or the bleed or slug area on the pasteboard?

- A. Crop to
- B. Pages
- C. Crop pages
- D. Show preview

Correct Answer: A

The Crop to option specifies how much of the page, or pages to place; the page itself, or the bleed or slug areas on the pasteboard.

Answer: D is incorrect. The Show preview option previews a page before you place it. You can type a page number or click the arrows to preview a page in a multi-page document.

Answer: B is incorrect. The Pages option specifies the pages you want to place; such as the page displayed in the preview, all pages, or a range of pages.

Answer: C is incorrect. This is an invalid answer option.

---

## QUESTION 3

You are creating a document. You have created and applied a table style to a table that results in the table being filled with the yellow color. You also have a cell style which fills a cell with the blue color. What happens when you apply this cell style to a cell of the table?

- A. The cell color remains unchanged.
- B. The cell color changes to Yellow.
- C. The cell color changes to blue.
- D. The cell color changes to black.

Correct Answer: C

When you apply this cell style to a cell of the table, the cell color changes to blue. As this cell style fills a cell with the blue color, therefore when it will be applied to a cell of the table the cell color will change to blue color.

**QUESTION 4**

Which of the following is similar to EPS?

- A. InDesign
- B. Flash
- C. Illustrator
- D. Photoshop

Correct Answer: C

- 1.BMP. It is the native Windows bitmap format.
  - 2.EPS. EPS or Encapsulated PostScript file format is favored by professional publishers. One of its color-separated variant is DCS or Desktop Color Separation.
  - 3.GIF. GIF or Graphics Interchange Format is common in Web documents.
  - 4.Illustrator. It is similar to EPS.
  - 5.InDesign. Other InDesign documents can be imported, as if they are graphics. Specific pages can also be chosen to be imported.
  - 6.JPEG. JPEG or Joint Photographic Expert Group compresses bitmap format used on the Web.
  - 7.PCX. PCX or PC Paintbrush was very popular in earlier versions of Windows and DOS programs. It has been supplanted by other formats.
  - 8.PDF. PDF or Portable Document Format is a variant of PostScript and is used for Web-based, network-based, and CD-based documents.
  - 9.Photoshop. Photoshop is the native format in Adobe Photoshop 5.0 through CS5.
  - 10.PICT. PICT or Picture is used in professional documents.
  - 11.PNG. PNG or Portable Network Graphics is more capable than GIF.
  - 12.Scitex CT. It is the continuous-tone bitmap format used on Scitex prepress systems.
  - 13.TIFF. TIFF or Tagged Image File Format is the bitmap standard for image editors and publishers.
  - 14.Windows Metafile. Windows Metafile is used in professional documents.
- 

**QUESTION 5**

Andy works as a Web developer for company Inc. He has created a Web page using InDesign CS5 with an extensive amount of information. He wants to use links for the convenience of the users of his Website so that they can directly get to a particular section on the current Web page.

Which of the following panels will Andy use to accomplish this task?

- A. Links panel

- B. Pages panel
- C. Preflight panel
- D. Hyperlinks panel

Correct Answer: D

The Hyperlinks panel is a feature of InDesign CS5 which is used to create hyperlinks in a document so that when a user exports to Adobe PDF or SWF in InDesign, a viewer can click a link to jump to other locations in the same document, to other documents, or to websites. To open the Hyperlinks panel in InDesign CS5, use one of the following steps: Choose Window > Interactive > Hyperlinks. Choose Window > Type and Tables > Cross-References.

Answer option A is incorrect. The Links panel is a feature of InDesign where all the files are listed and placed in a document. These include both local (on disk) files and assets that are managed on a server. However, the files that are pasted from a website in Internet Explorer are not displayed in this panel. The Links panel is shown in the image below:

Answer option B is incorrect. The Pages panel is used in InDesign to work with document pages as well as master pages. It allows a user to create pages,

which can be blank pages or based on a master page. These pages can be moved, copied, and deleted, as well as for retrospectively applying a master. The Pages panel also provides an excellent method to navigate through longer documents. To open the Pages panel, choose **Window > Pages**, or press **Control+F12** on the keyboard. The Pages panel is shown in the image below:

Answer option C is incorrect. The Preflight panel is a feature of InDesign CS5 that warns of the problems that could prevent a document or book from printing or outputting as expected while a document is being edited. These problems include missing files or fonts, low-resolution images, overset text, and a number of other conditions.

The preflight settings can be configured to define which conditions are detected. These preflight settings are stored in preflight profiles for easy reuse. To open the Preflight panel, choose **Window > Output > Preflight**, and double-click the Preflight icon at the bottom of the document window. The Preflight icon is green if no errors are detected or red if errors are detected. The Preflight panel is shown in the image below:
