-  **800,000+** Satisfied Customers

QUESTION 1

What is the purpose of the WLAN component shown in the exhibit?

- A. Connecting an unterminated coaxial RF cable to an N-type female connector on an antenna
- B. Adapting an antenna with an SMA connector to an AP with an N-type female connector
- C. Connecting a lightning arrestor (gas discharge tube) to a grounding rod cable
- D. Providing a fixed amount of signal attenuation between a signal source and an SMA antenna connector

Correct Answer: B

QUESTION 2

Which features are incorporated in the 802.11-2007 specification and are recommend for robust WLAN client security?
(Choose 2)

- A. SSID hiding
- B. CAPWAP with DTLS
- C. 802.1X/EAP
- D. CCMP cipher suite
- E. IPSec VPN
- F. MAC address whitelists

Correct Answer: CD

QUESTION 3

Using the exhibit as a reference,

what is the maximum number of spatial streams that could be used for a downlink HT-OFDM transmission from AP-1 to STA-3?

- A. One spatial stream, because the BSS must maintain backwards compatibility with STA-2, which supports only 802.11g (ERP) without MIMO or multiple spatial streams.
- B. Two spatial streams, because the number of spatial streams for an HT-OFDM transmission is limited to the capabilities of the least capable HT station in the BSS.
- C. Two spatial streams, because the third transmit chain in the HT AP must be used simultaneously for protection mechanisms with the 802.11g (ERP) station.
- D. Three spatial streams, because HT-OFDM transmissions will be preceded with protection mechanisms using a basic data rate for STA-2 and possibly STA-1.

Correct Answer: D

QUESTION 4

What statements describe industry practices for communication protocols between WLAN controllers and controller-based APs? (Choose two)

- A. All vendors use the same protocol so that APs will interoperate with WLAN controllers from other vendors.

- B. Some vendors use proprietary protocols, and some vendors use protocols based on public standards like RFCs.
- C. For most vendors, the controller-based APs maintain data and control tunnels with at least two controllers for immediate failover and redundancy.
- D. All vendors support at least one L2 or L3 broadcast protocol for controller discovery by controller- based APs.
- E. All vendors recommend using L2 (instead of L3) controller discovery and tunneling protocols in large enterprises.

Correct Answer: BD

QUESTION 5

What statements describe industry practices for communication protocols between WLAN controllers and controller-based APs? (Choose two)

- A. All vendors use the same protocol so that APs will interoperate with WLAN controllers from other vendors.
- B. Some vendors use proprietary protocols, and some vendors use protocols based on public standards like RFCs.
- C. For most vendors, the controller-based APs maintain data and control tunnels with at least two controllers for immediate failover and redundancy.
- D. All vendors support at least one L2 or L3 broadcast protocol for controller discovery by controller- based APs.
- E. All vendors recommend using L2 (instead of L3) controller discovery and tunneling protocols in large enterprises.

Correct Answer: BD
