**QUESTION 1**

Which statement describes the Culture phase of Garage Method?

- A. Ensure operational excellence with continuous application monitoring
- B. Incrementally deliver solutions by using IBM Design Thinking
- C. Transform the organization by combining business, technology, and process innovations
- D. Accelerate time-to-market through continuous integration and continuous deployment

Correct Answer: A

---

**QUESTION 2**

In relation to Block Storage, why is I OPS an important consideration?

- A. It can have an impact on application performance
- B. If the slices are too small, an application will not have enough storage
- C. The higher the flow, the faster the disk spins which can cause data corruption
- D. A system must be designed so that it stores less data than this total

Correct Answer: A

---

**QUESTION 3**

Which are two limitations of the CouchBackup tool?

- A. The database cannot be accessed while the tool is running
- B. Index definitions are backed up by the tool but the content of indexes is not
- C. it does not offer a way to restore backups
- D. It's not possible to embed tool commands into UNIX shell scripts
- E. Attachments are not backed up by the tool

Correct Answer: BE

<https://cloud.ibm.com/docs/services/Cloudant?topic=cloudant-ibm-cloudant-backup-and-recovery>

The CouchBackup tools have the following limitations:

security settings are not backed up by the tools.

Attachments are not backed up by the tools.

Backups are not precisely accurate "point-in-time" snapshots.

The reason is that the documents in the database are retrieved in batches, but other applications might be updating documents at the same time. Therefore, the data in the database can change between the times when the first and last batches are read. Index definitions that are held in design documents are backed up, but the content of indexes is not backed up.

This limitation means that when data is restored, the indexes must be rebuilt.

The rebuilding might take a considerable amount of time, depending on how much data is restored.

---

#### QUESTION 4

A client wants to quickly develop a Proof of Concept application in the cloud, using Node.js. Which cloud service model enables them to begin developing immediately?

- A. IaaS
- B. SaaS
- C. DbaaS
- D. PaaS

Correct Answer: D

---

#### QUESTION 5

What are two ways the appropriate level of security is ensured when managing API as a product?

- A. Handle errors on assembly
- B. Incorporate authentication tools
- C. Control and enrich API messages using JavaScript
- D. Monitor API usage
- E. Inject HTTP headers into a response

Correct Answer: CE
