QUESTION 3

What does an active workflow process define?

- A. The flow of work in Application Designer
- B. The process to add an attribute to an application
- C. The different work to be performed by the lead craft
- D. The different paths that a record can take as it moves through a business process

Correct Answer: D

You use the Workflow Designer application to create, to view, to modify, and to delete workflow process records that reflect your business processes. An active workflow process defines the different paths that a record can take as it moves through a business process. The workflow process also specifies the actions and notifications that can take place at different points in a process.
