QUESTION 1

A deployment professional has enable tracing for the WebSEAL instance to assist developers in troubleshooting the application. A developer requests a trace containing the request message bodies to and from WebSEAL.

Which log file contains this information?

- A. request.log
- B. pdweb.snoop.log
- C. pdweb.debug.log
- D. pdweb.request.log

Correct Answer: B

QUESTION 2

A company is concerned that it possesses data in the user registry which belongs to several companies that are sharing an IBM Security Access Manager (ISAM) V9.0 deployment. The ISAM deployment professional wants to separate the user registry data so there is no data overlap and data integrity is maintained.

How can this be achieved in an ISAM environment?

- A. By configuring junctions
- B. By creating custom domains
- C. By applying authorization rules
- D. By using appropriate authentication methods

Correct Answer: C

QUESTION 3

How should the disk space occupied by the several large support files be reduced?

- A. Configure automatic roll over of support files using the LMI
- B. Download the support files and delete them from the appliance
- C. Download the support files which will also delete them from the appliance
- D. Configure support file retention policy using the LMI to restrict, such that files older than a certain date are purged

Correct Answer: B

The size of these files can grow large over time. To reduce the disk space that is occupied by these files, download unused support files to an external drive. Then, delete the support files from the appliance.

QUESTION 5

A company is planning to deploy an IBM Security Access Manager (ISAM) V9.0 cluster to provide high availability services to its customer. ISAM cluster members are separated by a firewall.

Which port(s) should be open in the firewall to assure normal cluster service functionality?

- A. 21
- B. 22
- C. 2020
- D. 2020 to 2050

Correct Answer: B
