QUESTION 1

You want to use the Change and Transport System (CTS) to perform transports of non-ABAP objects into non-ABAP systems. Which configuration settings are necessary for this?

- A. The transport domain controller system must be based on SAP NetWeaver AS 7.00 SP Stack 12 or higher.
- B. You must use client-dependent transport routes for all systems in your transport domain.
- C. You need to adjust certain tp parameters for the non-ABAP systems in question.
- D. The CTS Deploy Web Service must be configured.

Correct Answer: ACD

QUESTION 2

You want to improve the data access performance for your SAP database and also to avoid its deterioration in future. Which is the best strategy?

- A. Use as many data files as there are CPUs dedicated to the SQL Server.
- B. Use as many data files as there are CPUs on the database host.
- C. When the database is growing, regularly create new data files for new data to avoid uncontrolled growth of existing files, because data access performance directly depends on the size of the data files.
- D. Keep number of data files of the SAP database and of the tempdb database approximately equal.

Correct Answer: A

QUESTION 3

What consequences has the use of "native SQL" in ABAP programs written by customers?

- A. Loss of database independence for these programs
- B. No buffering of table content on the SAP application server
- C. No lock handling by the enqueue work process
- D. The use of native SQL always results in poor performance

Correct Answer: AB

QUESTION 4

Which of the following processes connect to the database during the startup of an instance of an SAP system based on AS ABAP?

- A. The gateway process, via remote function call (RFC)
- B. All work processes connect to the database
- C. The message server, in order to check a valid SAP license
- D. The dispatcher process via JDBC

Correct Answer: B

QUESTION 5

Which of the following are repository objects in an AS ABAP-based SAP system? (Choose two)

- A. Programs
- B. Buffer areas
- C. Screens (Dynpros)
- D. Client-independent customizing settings

Correct Answer: AC
