QUESTION 1

What is the purpose of the "Manage Users" section of the Manage Jenkins dashboard?

A. Contains entries used for the security matrix or project security matrix.

B. Defines aliases for credentials that have been created In the external security realm.

C. Each user who is allowed access to Jenkins must have an entry in this Jenkins user database.

D. Defines user groups used for role-based strategy authorization.

E. Populates the Jenkins user database that can be used if you are not using an external security realm such as LDAP, Active Directory, or Unix user/groups.

Correct Answer: C

QUESTION 2

Which of the following are true when using build parameters? Choose 3 answers

A. If your Jenkinsfile specifies parameters with the "parameters\\'\\' directive, those are the only parameters recognized when the Pipeline executes; any parameters that were specified In the "Project is parameterized" section of the Job configuration are cleared.

B. Use the "params" object to reference parameters that are defined on "The project is parameterized" section of the job configuration.

C. Use the "parameters" directive to define parameters for your Pipeline Inside your Pipeline code.

D. If you configure a build parameter of type File, then users can specify a file on the server as build input.

Correct Answer: ABC

QUESTION 3

Yon are an administrator of a base Jenkins master with the recommended plugin set and you want to connect a new agent using SSH. Authentication on the remote node that will host the agent is done with an SSH key pair which your users must NOT be able to see or access. Which of the following is TRUE assuming your users do not have admin rights?

A. Use a credential "SSH Username with private key", restricted to the Scope "System", for the node\\'s SSH authentication.

B. You cannot use an SSH key-pair. Configure a password for the agent\\'s SSH user, and create a credential of type "Username with password" for the node\\'s SSH authentication.

C. Use a credential "SSH Username with private key", restricted to the Scope "Agents", for the node\\'s SSH authentication.

D. The SSH key will be stored in the JENKINS_HOME/.ssh folder. Configure the agent to use a key from the "standard"

SSH folder.

Correct Answer: A

QUESTION 4
