## QUESTION 1

You are currently managing workloads running on Windows Server for which your company owns the licenses. Your workloads are only needed during working hours, which allows you to shut down the instances during the weekend. Your Windows Server licenses are up for renewal in a month, and you want to optimize your license cost.

What should you do?

- A. Renew your licenses for an additional period of 3 years. Renew your licenses for an additional period of 3 years. Negotiate a cost reduction with your current hosting provider wherein infrastructure cost is reduced when workloads are not in use
- B. Renew your licenses for an additional period of 2 years. Negotiate a cost reduction by committing to an automatic renewal of the licenses at the end of the 2 year period
- C. Migrate the workloads to Compute Engine with a bring-your-own-license (BYOL) model
- D. Migrate the workloads to Compute Engine with a pay-as-you-go (PAYG) model

Correct Answer: D

Explanation: The PAYG model is more convenient because you only pay for usage. And the case describes that the workloads are only run on certain days.

## QUESTION 2

An e-commerce company's business has been booming. To keep up with the growth the IT team also grew. Many new people are being added and new resources are being set up. The CIO is in conversation with you over coffee one day and expresses her growing concern that they might be moving too fast. Their security checks and policies have not kept pace. She worries that somebody would make a misconfiguration or compliance violation thus exposing the company to data and privacy loss. What can you advise her?

- A. Use Cloud Identity-Aware Proxy to allow only specific users to access the data.
- B. Use Security Command Center to have a centralized view of assets and get notified on misconfigurations and vulnerabilities.
- C. Use Cloud Data Loss Prevention to prevent the loss of any data.
- D. Use Cloud Armor to block any DDoS attacks that could be a threat.

Correct Answer: B

Explanation: Security Command Center is the right tool for this use case. It can check resources for security issues and notify you when issues are found.

## QUESTION 3

You have contracted a partner to conduct some medical trials. This is a limited, 2-month contract. At the end of each

day, you are expecting about 10 Gbs of data. The data is highly sensitive. What networking option would you employ?

- A. As the name indicates, set up Partner Interconnect with your partner company.
- B. Setup Dedicated Interconnect with your partner.
- C. Setup Cloud VPN and create an IPsec VPN tunnel with your partner.
- D. Create a public IP for a VM and share that with your partners so that they can access it over the internet and share the data.

Correct Answer: C

Explanation: "Cloud VPN securely extends your peer network to Google's network through an IPsec VPN tunnel. Traffic is encrypted and travels between the two networks over the public internet. Cloud VPN is useful for low-volume data connections. For additional connection options, see the Hybrid Connectivity product page."

---

## QUESTION 4

Your organization needs to plan its cloud infrastructure expenditures. Which should your organization do?

- A. Review cloud resource costs frequently, because costs change often based on use
- B. Review cloud resource costs annually as part of planning your organization's overall budget
- C. If your organization uses only cloud resources, infrastructure costs are no longer part of your overall budget
- D. Involve fewer people in cloud resource planning than your organization did for on-premises resource planning

Correct Answer: A

Explanation: Review cloud resource costs frequently, because costs change often based on use because One need to know current usage/ trend for planning; While public cloud eliminates capex, and gets into pay as you go model, the usage pattern determines the cloud cost and hence needs to be measured frequently to enable better forecast

---

## QUESTION 5

Which of the following is/are true about Anthos?

- A. Enterprise-grade container orchestration and management service.
- B. Modernizing your security for hybrid and multi-cloud deployments
- C. Fully managed service mesh with built-in visibility
- D. All of the Above

Correct Answer: D

Anthos :

Anthos unifies the management of infrastructure and applications across on-premises, edge, and in multiple public clouds with a Google Cloud-backed control plane for consistent operation at scale.

-Build, deploy, and optimize apps on GKE and VMs anywhere--simply, flexibly, and securely.

-Consistent development and operations experience for hybrid and multi-cloud environments. Key features:

1.

Enterprise-grade container orchestration and management service

2.

Automate policy and security at scale

3.

Fully managed service mesh with built-in visibility

4.

Modernizing your security for hybrid and multi-cloud deployments
