### QUESTION 1

Multiple RDF groups from Different Symmetric arrays have been grouped together to enable Multi Sessions consistency. How does Cycle Switching occur in this configuration?

- A. Cycle switches are controlled by the master Symmetrix.
- B. Cycle switches are controlled by RDF daemon
- C. Cycle switches always occur independently on each Symmetrix after 30 minutes
- D. Cycle switches always occur simultaneously on each Symmetrix arrays after 30 minutes

Correct Answer: B

---

### QUESTION 2

The necessary infrastructure is in place for application restart at a remote site. What is the primary impact to the customer of a single-hop SRDF/AR solution compared to SRDF/S?

- A. Increased RTO with SRDF/S
- B. Increased RPO with SRDF/AR
- C. Increased number of links with SRDF/AR
- D. Decreased network bandwidth is needed with SRDF/S

Correct Answer: B

Explanation:

Increased RPO with SRDF/AR is the only correct answer because the restart is occurring at the remote site. All data that has yet to be transferred over to the

remote site will not be able to until the remote site is running again.

---

### QUESTION 3

What is the state of the standard and BCV devices after a Full Time/Finder "Establish" has been installed?

- A. Standard is Read Only and BCV is Read Only
- B. Standard is Read Only and BCV is Not Ready

- C. Standard is Read/Write and BCV is Not Ready
- D. Standard is Read/Write and BCV is Read/Write

Correct Answer: A

---

#### QUESTION 4

What is an advantage of using thin provisioning?

- A. When the provisioning volume also protected with SRDF, no mirror positions would be used.
- B. Thin provisioning presents an application with more capacity than is physically allocated.
- C. Symmetrix Optimizer automatically tunes, monitors, analyzers, and migrate thin volumes to maintain optimal performance.
- D. The provisioning will help meet service-level requirements while providing powerful local- replication Capabilities.

Correct Answer: B

---

#### QUESTION 5

A customer has implemented a symclone create command with the pre copy option. The clone session was than activated. At this point what is the state of the clone target device?

- A. White Dashboard (WD)
- B. Read write enabled (RW)
- C. Not Ready (NR)
- D. Read Only enabled (RO)

Correct Answer: B

---
