- C. com.documentum.web.formext.action.IActionExecution
- D. com.documentum.web.env.IDispatch

Correct Answer: C

QUESTION 2

Which statement is true about component initialization for all base containers?

- A. The onInit() of the container initializes none of the components.
- B. The onInit() of the container initializes all components automatically.
- C. The onRender() of the container calls the onInit() of all components.
- D. The onInit() of the container initializes the first referenced component.

Correct Answer: D

QUESTION 3

To create a custom WDK control, what needs to be done?

- A. extend control class, control-Tag/bodyTag class and create an xsd schema file
- B. extend control class, control-Tag/bodyTag class, and create a tag definition .tld file
- C. extend control class, control-Tag/bodyTag class, and create a control xml definition file
- D. extend component class and create a control xml definition file

Correct Answer: B

QUESTION 4

You have added a new language to your application by adding a new locale to app.xml and you have restarted your application server. Which statement is true?

- A. Users selecting the new language on login receive blank messages instead of non-localized messages.

- B. Only components with localized messages or defined fallback rules for the new language can be called.
- C. The application fallback rules determine what is displayed for non-localized messages.
- D. If a localized message cannot be found, an error is raised.

Correct Answer: C

QUESTION 5

For what can a configuration lookup hook be used?

- A. to disable lookup of web.xml configuration elements
- B. to override lookup calls to the configuration service
- C. to enable lookup of NLS configuration in properties files
- D. to override lookup calls to component configuration context

Correct Answer: B
