QUESTION 1

For which IT solution is an Isilon NL-Series node best suited?

- A. Internet Web 2.0 applications
- B. Nearline archiving
- C. Quantitative analysis
- D. Hadoop workflows

Correct Answer: C

QUESTION 2

An organization has an Isilon cluster with 15 S-S210 nodes in a single node pool and 20 NL400 nodes in a second node pool. They want to implement Global Namespace Acceleration. Which requirements must be achieved before Global Namespace Acceleration can be activated?

- A. All S210 nodes must contain one SSD drive SSD capacity must be at least 0.5% of the total cluster space
- B. At least seven S210 nodes must contain at least one SSD drive SSD capacity must be at least 1.5% of the total cluster space
- C. All S210 nodes must contain at least one SSD drive SSD capacity must be at least 2.25% of the total cluster space
- D. All S210 nodes must contain at least one SSD drive SSD capacity must be at least 20% of the total cluster space

Correct Answer: B

QUESTION 3

A company has two Isilon clusters located in San Francisco, California. One cluster is the source and the other is the target. For efficiency, the dataset is being replicated between the two clusters within the same data center. The target cluster will be moved to the New York area as part of a disaster recovery solution once the initial full copy is complete.

Once the cluster has been moved to New York, what will mitigate re-transmitting the entire dataset over the WAN to the target cluster in the new location?

- A. Enable target compare initial sync and then re-run the policy
- B. Run a sync policy with excluded directories defined
- C. Run a copy policy with excluded directories defined
- D. Enable the policy to run on all nodes in the cluster

Correct Answer: A

QUESTION 4

What are the minimum requirements needed to enable the Global Namespace Acceleration setting?

- A. 1.5% of the disks capacity must be SSD 20% of the nodes must contain SSDs
- B. 2.0% of the disks capacity must be SSD 5% of the nodes must contain SSDs SmartPool license
- C. 2.5% of the disks capacity must be SSD SmartPool license
- D. 20% of the number of disks must be SSDs

Correct Answer: A

QUESTION 5

A storage administrator needs to enable FTP service on an Isilon cluster to allow internal customers to upload files to the company. However, the administrator does not want to create individual user names and passwords for each internal customer.

How can the cluster support this requirement?

- A. Enable FTP anonymous access
- B. Configure Active Directory to support anonymous access
- C. Configure LDAP to support anonymous access
- D. Enable FTP server-to-server transfers

Correct Answer: A
