QUESTION 1

What are members of an EMC Avamar group policy?

A. Dataset, Schedule, and Retention

B. Profile, Dataset, and Schedule

C. Clients, Profile, and Retention

D. Notification, Schedule, and Dataset

Correct Answer: A

QUESTION 2

Which command is used to convert new Avamar nodes to storage nodes?

A. change_nodetype

B. avmaint

C. avmgr

D. dpnctl

Correct Answer: A

QUESTION 3

By default, which process runs on the EMC Avamar utility node?

A. GSAN

B. MCS

C. avscc

D. SNMP

Correct Answer: B

QUESTION 4

At which percentage of user capacity are new backups suspended in an EMC Avamar environment?

A. 85

B. 95

C. 96

D. 100

Correct Answer: B

Capacity Threshold Warnings: 80% of user capacity = warning, start planning for expansion or cleanup 95% user capacity is the health check warning, new backups are suspended 100% user capacity makes the Avamar read-only, can still restore from server 85% of OS capacity = Garbage collection stops running, utilization increases rapidly 90% OS capacity = HFS checks stop running 96% OS capacity = no more checkpoints

---

QUESTION 5

During EMC Avamar garbage collection, which backups are candidates for deletion?

A. Backups that failed HFS check

B. Backups that were replicated to Data Domain

C. Backups of clients that have been retired

D. Partial backups older than seven days

Correct Answer: D

For initial backup of Avamar clients, it\\'s best to start with a small number of clients to produce a dataset from which commonality will be generated. This will increase the backup speed of following clients. On a new Avamar system, consider enabling overtime because all the data is new and there won\\'t be much maintenance to take place. Never enable overtime on an existing Avamar, rather configure the use of partial backups to be saved. Partial backups are saved for 7 days and are not deleted by the garbage collection process. When an unfinished job ends before completing and partial backups are enabled, the backup job will continue from the last known state and will complete faster. http://gregandthenetwork.blogspot.com/2013/12/avamar-configuration-design-best.html https://communities.vmware.com/message/2166196
