QUESTION 1

When setting up a new computer, where does a user change the date and time?

- A. Peripheral configuration
- B. Localization settings
- C. Screen resolution
- D. eSATA settings

Correct Answer: B

QUESTION 2

Joe, a user, has many applications on his computer and is trying to use software management best practices.

Which of the following should he consider?

- A. Install a desktop cleanup application.
- B. Uninstall unneeded applications.
- C. Load each application one at a time.
- D. Manage the use of internal memory.

Correct Answer: B

QUESTION 3

When trying to activate the operating system, a user receives a notice that the software is not genuine.

Which of the following security threats has occurred?

- A. Social engineering
- B. Phishing
- C. Virus attack
- D. License theft

Correct Answer: D

QUESTION 4

You are responsible for tech support at your company. You have been instructed to make certain that all desktops support file and folder encryption. Which file system should you use when installing

Windows XP?

- A. FAT
- B. EXT4
- C. FAT32
- D. NTFS

Correct Answer: D

NTFS is the file system first introduced with Windows 2000 and it inherently supports file encryption as well as other exciting features such as file compression.

What is NTFS?

NTFS is an advanced file system designed for use specifically in Windows NT, Windows 2000/2003, and Windows XP operating systems. It supports file system recovery, large storage media, long file names, and other features. NTFS offers

features such as disk quotas, distributed link tracking, compression, and mounted drives.

NTFS also offers security features, such as encryption and file and folder permissions.

These features are not available on FAT volumes.

Answer options A and C are both incorrect. FAT is an old file system used with DOS and Windows

3.1. FAT32 was simply a 32 bit version of FAT and was used with Windows 95 and Windows 98.

Neither FAT nor FAT32 support file or folder encryption. Answer option B is incorrect. EXT is a file system used with Linux and does not work with any version of Windows.
