QUESTION 1

The sales tax on clothing items in Country A is 25 percent of the purchase price of the item, and the sales tax on clothing items in Country B is 20 percent of the purchase price of the item. If the two countries have the same currency and if the price of a certain clothing item is the same in both countries, what percent greater is the amount of sales tax on the clothing item purchased in Country A than the amount of sales tax on the clothing item purchased in Country B ?

A. 25%

Correct Answer: A

QUESTION 2

Larvae of many marine invertebrate species delay their metamorphosis into juveniles when cues signaling an appropriate juvenile environment are absent, thereby increasing their likelihood of thriving as juveniles and of ultimately reaching adulthood. Nevertheless, delayed metamorphosis has potential costs for juveniles including reduced growth and increased mortality. Nearly all evidence of such costs involves species whose larvae do not feed but rather subsist on stored nutrients, indicating that insufficient energy reserves may be an underlying cause of these costs. Supporting this hypothesis are laboratory studies showing that in a certain bryozoan, the prolonged larval swimming that results from delayed metamorphosis is associated with size reductions in the juvenile feeding organ (the lophophore) and that one factor influencing the size of juveniles of certain barnacle species is how long larvae delay metamorphosis. However, other studies show that while significantly fewer juvenile *Capitella* worms survived to adulthood when metamorphosis had been delayed, prolonged larval swimming had no significant effect on juvenile size, suggesting, perhaps, that in some species,

factors other than insufficient energy reserves account for the negative effects of the larval stresses that result from delayed metamorphosis.

The passage suggests that the "bryozoan," the "barnacle species," and "*Capitella* worms" all share which of the following characteristics?

- A. The larvae of these species do not feed but rather subsist on stored nutrients.
- B. The larvae of these species are unable to undergo metamorphosis if larval swimming is significantly prolonged.
- C. The larvae of these species do not have enough energy to meet their needs when metamorphosis is delayed.
- D. The juveniles of these species manifest the negative effects of delayed metamorphosis as a decrease in size.
- E. The juveniles of these species are not significantly larger than their respective larvae.

Correct Answer: C

QUESTION 3

A group of children is divided into r teams of n players each, and 1 team of 10 players. The group has more than 30 but less than 50 children, and each child belongs to only one team.

Quantity A

The number of children in the group

Quantity B

38

- A. Quantity A is greater.
- B. Quantity B is greater.
- C. The two quantities are equal.
- D. The relationship cannot be determined from the information given.

Correct Answer: D

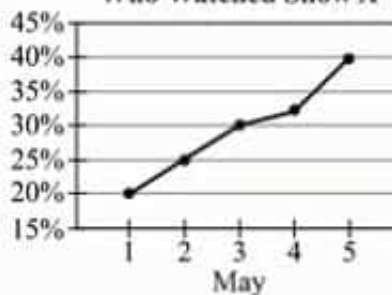

QUESTION 4

Television Viewing From May 1 to May 5

Daily Number of Television Viewers
(in millions)

Percent of Daily Television Viewers Who Watched Show X

The number k of television viewers who watched Show X on May 2 is approximately what percent greater, or less, than the number n of television viewers who watched Show X on May 1 ?

- A. k is 2.5 percent less than n .
- B. k is 5 percent less than n .
- C. k is 5 percent greater than n .
- D. k is 18 percent greater than n .
- E. k is 22 percent greater than n .

Correct Answer: D

QUESTION 5

Quantity A

The sum of the interior angles of a square

Quantity B

The sum of 4 of the interior angles of a regular pentagon

- A. Quantity A is greater.
- B. Quantity B is greater.
- C. The two quantities are equal.
- D. The relationship cannot be determined from the information given.

Correct Answer: B
