**QUESTION 1**

In a two-node cluster (active/standby) scenario of U1900, which of the following statements is CORRECT?

- A. The active and standby nodes can only be U1980 or U1981, and the board distribution must be the same on the two nodes.
- B. The U1900 model used on the active node can be different from that on the standby node.
- C. The active and standby nodes must use the same software version.

Correct Answer: C

---

**QUESTION 2**

Which of the following services does the eServer provide? (Multiple Choice)

- A. Status presence
- B. Instant messaging
- C. SIP registration
- D. File transfer

Correct Answer: ABD

---

**QUESTION 3**

eSpace Desktop needs to register with several devices during a login. What are the devices? (Multiple Choice)

- A. eServer
- B. BMU
- C. IPPBX
- D. Console server

Correct Answer: AC

---

**QUESTION 4**

What are the possible causes when eSpace Desktop fails to initiate an instant conference? (Multiple Choice)

- A. The account does not have the right to hold instant conferences.
- B. The data conference license has expired.

- C. The client function parameters are incorrectly set in the eServer configuration file.
- D. Related parameters in the data conference configuration file are incorrectly set.
- E. The unified gateway, BMU, and data conference server are not time-synchronized.

Correct Answer: ABDE

---

## QUESTION 5

Which of the following statements is INCORRECT about toll fraud in an enterprise?

- A. User A illegally registers with unified gateway B and directly calls external user D. During the process, user A does not need to pay any fees, which results in toll fraud.
- B. External user B dials the VU of the enterprise (enterprise where unified gateway A is located). When hearing a voice announcement or two-stage dialing tone, user B can directly make national toll calls. In this case, user B pays only local call fees. The international toll call fees, however, must be paid by the enterprise, which forms toll fraud.
- C. External user C dials the trunk prefix from unified gateway A to unified gateway B, toll call prefix on unified gateway B, and toll call number to make an outgoing call.
- D. User D in the enterprise makes international toll calls in non-working hours.

Correct Answer: D
