QUESTION 1

The following figure shows the configuration. Which of the following statements are false? (Multiple Choice)

- A. The mpls lsr-id command configures the LSR ID. This command is the prerequisite for other MPLS commands. By default, this command is not configured.
- B. The mpls command can be run in the system view and interface view to enable MPLS. You can configure a LSR ID after MPLS is enabled.
- C. After MPLS is enabled globally, you do not need to enable MPLS in the interface view again.
- D. The last command configures LSRA as the ingress LSR and creates a static LSP.

Correct Answer: BC

QUESTION 2

Complex traffic classification means that packets are classified based on the quintuple including the source and destination addresses, source and destination port numbers, and protocol type. It is usually deployed on the network core.

- A. TRUE
- B. FALSE

Correct Answer: B

QUESTION 3

When configuring MPLS VPN, the administrator configures the following commands. Which of the following statements is false?

- A. This command is generally configured on a PE.
- B. This command binds GO/0/1 and GO/0/2 on the PE to the VPN instances assigned for the customer network.
- C. After an interface is bound to a VPN instance, the interface becomes a private network interface, which can be assigned with a private network address and run a private network routing protocol.
- D. If an interface is unbound from a VPN instance, the device does not automatically clear IPv4 or IPv6 configurations

on the interface.

Correct Answer: D

QUESTION 4

Which of the following statements regarding Free Mobility of the Agile Controller are true? (Multiple Choice)

- A. When administrators configure Free Mobility, they need to select proper authentication points and policy execution points.
- B. In the Free Mobility, Administrators can add static network segments or server resources to security groups, and manually bind their IP addresses to the security groups.
- C. Free Mobility uses a configuration matrix to define access permissions between two security groups such as users and servers.
- D. Free Mobility defines higher forwarding priorities for the VIP user group to ensure their network experience.

Correct Answer: ACD

QUESTION 5

Which of the following protocols are multi-channel protocols? (Multiple Choice)

- A. FTP
- B. Telnet
- C. H.323
- D. SMTP

Correct Answer: C
