QUESTION 1

What is a data parameter type?

A. Sequential Number

B. Scenario ID

C. Rendezvous

D. File

Correct Answer: D

QUESTION 2

What does the lr_advance_param command do?

A. advances all data rows between iterations

B. immediately advances the current data row for the all columns in a data table

C. advances a given column\\'s data row for only one column between iterations

D. immediately advances the current data row for only one column in a data table

Correct Answer: D

QUESTION 3

Which protocols capture actual think times? (Select two.)

A. ODBC

B. Click-n-Script

C. TruClient

D. JavaScript

E. RTE

Correct Answer: AB

QUESTION 4

After finishing editing a previously recorded script, you push the Play button. Which log contains the actions and errors of the Vuser as it runs?

A. Recording Log

B. Generation Log

C. Replay Log

D. current log that is playing

Correct Answer: C

QUESTION 5

You have just completed an advanced script that must get a real-time security encryption key for a login function. The security encryption key is obtained by loading a custom DLL using rc=lr_load_dll("SecureAcces.dll") and then calling a

custom function. The login logic works on the Controller where you are developing the VuGen script, but when replaying on remote Load Generators, the script fails with error code rc=11.

How can you fix this error 11? (Select two.)

A. The full path should have been specified. You change the command to lr_load_dll("c:\temp\SecureAcces.dll");

B. In the Controller, you select the script on the Design tab, then click the buttons Details, More, Files, Add and add the DLL

C. \temp\SecureAcces.dll.

D. In the VuGen Run-time Settings, you select Additional attributes and click Add, then you select the DLL c:\temp\SecureAcces.dll so it can be found by all machines.

E. The DLL name was misspelled. You correct the error and rerun the scenario.

F. You add the DLL c:\temp\SecureAces.dll using VuGen menu File > Add Files to Script.

Correct Answer: BE
