QUESTION 1

What is the difference between dropping a partition and deleting records?

- A. Dropping a partition creates delete vectors; deleting records does not create delete vectors.
- B. Dropping a partition can be rolled back; deleting records cannot be rolled back.
- C. Dropping a partition creates new files; deleting records does not create new files.
- D. Dropping a partition recovers space immediately; deleting records does not recover space immediately.

Correct Answer: A

QUESTION 2

What are the benefits of ordering data in projection design? (Select two.)

- A. It enables optimum encoding.
- B. It enables partitioning of data.
- C. It enables efficient sharing of data between similarly-ordered projections.
- D. It enables efficient application of query predicates.
- E. It enables segmentation of data.

Correct Answer: DE

QUESTION 3

What is a benefit of having identically-sorted buddy projections?

- A. improved storage usage, since Vertica shares data files
- B. more efficient use of disk since the data is only on one node
- C. better query performance, since Vertica gets half the data from each projection
- D. fast recovery of a down node

Correct Answer: D

QUESTION 4

During Vertica installation, how do you install onto multiple nodes of a cluster?

- A. You must install the application individually on each node.

- B. Run the installation script from the Console machine once per node.
- C. Pass the IP address or node names as part of the -s argument, and it will install the application on each node.
- D. Pass the IP addresses or node names to spread, and it will install the application on each node.

Correct Answer: C

Reference:https://my.vertica.com/wbt/installing_vertica/index.htm(start the video and go the topic that says multiple node installation)

QUESTION 5

How are records marked for deletion?

- A. Vertica removes the file that stores the deleted data.
- B. Vertica rewrites the files that contained the deleted records, ignoring records to be deleted.
- C. Vertica deletes the records from the original source files.
- D. Vertica creates a delete vector, identifying records to be deleted.

Correct Answer: D
