QUESTION 1

What is a key item that must be kept in mind when designing an enterprise-wide information security program?

- A. When defining controls follow an approach and framework that is consistent with organizational culture
- B. Determine controls in the light of specific risks an organization is facing
- C. Put an enterprise-wide network and Host-Based Intrusion Detection and Prevention System (Host-Based IDPS) into place as soon as possible
- D. Put an incident management and log file analysis program in place immediately

Correct Answer: B

QUESTION 2

Security monitoring is an important control measure to make sure that the required security level is maintained. In order to realize 24/7 availability of the service, this service is outsourced to a partner in the cloud.

What should be an important control in the contract?

- A. The network communication channel is secured by using encryption.
- B. The third party is certified against ISO/IEC 27001.
- C. The third party is certified for adhering to privacy protection controls.
- D. Your IT auditor has the right to audit the external party's service management processes.

Correct Answer: D

QUESTION 3

The information security manager is writing the Information Security Management System (ISMS) documentation. The controls that are to be implemented must be described in one of the phases of the Plan-Do-Check-Act (PDCA) cycle of the ISMS.

In which phase should these controls be described?

- A. Plan
- B. Do
- C. Check
- D. Act

Correct Answer: A

QUESTION 4

In a company the IT strategy is migrating towards a Service Oriented Architecture (SOA) so that migrating to the cloud is better feasible in the future. The security architect is asked to make a first draft of the security architecture.

Which elements should the security architect draft?

- A. Management and control of the security services
- B. The information security policy, the risk assessment and the controls in the security services
- C. Which security services are provided and in which supporting architectures are they defined

Correct Answer: C

QUESTION 5

When should information security controls be considered?

- A. After the risk assessment
- B. As part of the scoping meeting
- C. At the kick-off meeting
- D. During the risk assessment work

Correct Answer: A
