QUESTION 1

A security manager for a large company has the task to achieve physical protection for corporate data stores.

Through which control can physical protection be achieved?

- A. Having visitors sign in and out of the corporate datacenter
- B. Using a firewall to prevent access to the network infrastructure
- C. Using access control lists to prevent logical access to organizational infrastructure
- D. Using key access controls for employees needing access

Correct Answer: D

QUESTION 2

A security manager just finished the final copy of a risk assessment. This assessment contains a list of identified risks and she has to determine how to treat these risks.

What is the best option for the treatment of risks?

- A. Begin risk remediation immediately as the organization is currently at risk
- B. Decide the criteria for determining if the risk can be accepted
- C. Design appropriate controls to reduce the risk
- D. Remediate the risk regardless of cost

Correct Answer: B

QUESTION 3

The information security architect of a large service provider advocates an open design of the security architecture, as opposed to a secret design.

What is her main argument for this choice?

- A. Open designs are easily configured.
- B. Open designs have more functionality.
- C. Open designs are tested extensively.

Correct Answer: C

QUESTION 4

An experienced security manager is well aware of the risks related to communication over the internet. She also knows that Public Key Infrastructure (PKI) can be used to keep e- mails between employees confidential.

Which is the main risk of PKI?

- A. The Certificate Authority (CA) is hacked.
- B. The certificate is invalid because it is on a Certificate Revocation List.
- C. The users lose their public keys.
- D. The HR department wants to be a Registration Authority (RA).

Correct Answer: A

QUESTION 5

The ambition of the security manager is to certify the organization against ISO/IEC 27001. What is an activity in the certification program?

- A. Formulate the security requirements in the outsourcing contracts
- B. Implement the security baselines in Secure Systems Development Life Cycle (SecSDLC)
- C. Perform a risk assessment of the secure internet connectivity architecture of the datacenter
- D. Produce a Statement of Applicability based on risk assessments

Correct Answer: D
