Correct Answer: BD

QUESTION 5

An enterprise has two SMTP servers, one primary and one backup. They would like for all traffic to go to the primary server first. If the primary server fails, then traffic should go to the backup server. Once the primary server returns to normal operation, they would like traffic to return to the primary server. Which load balancing algorithm would meet this requirement?

A. Backup Chaining Revert enabled

B. Maximum Connections Revert enabled

C. Backup Chaining with Sticky enabled

D. Maximum Connections with Sticky enabled

Correct Answer: A
