QUESTION 1

Exhibit

```
user@SRX> show security flow session
...
Session ID: 4546, Policy name: policy1/8, Timeout: 4, Valid
  In: 10.10.10.2/6 --> 10.10.20.2/1382;icmp, Conn Tag 0x0, If: st0.0, Pkts: 1,
Bytes: 84
  Out: 10.20.20.2/1382 --> 10.10.10.2/6;icmp, Conn Tag 0x0, If: ge-0/0/3.0,
Pkts: 1, Bytes: 84
Session ID: 4547, Policy name: policy2/5, Timeout: 4, Valid
  In: 10.20.20.2/226 --> 10.10.10.2/38703;icmp, Conn Tag 0x0, If: ge-0/0/3.0,
Pkts: 1, Bytes: 84
  Out: 10.10.10.2/38703 --> 10.10.20.2/226;icmp, Conn Tag 0x0, If: st0.0, Pkts:
1, Bytes: 84
Total sessions: 13
```

You are validating bidirectional traffic flows through your IPsec tunnel. The 4546 session represents traffic being sourced from the remote end of the IPsec tunnel. The 4547 session represents traffic that is sourced from the local network destined to the remote network.

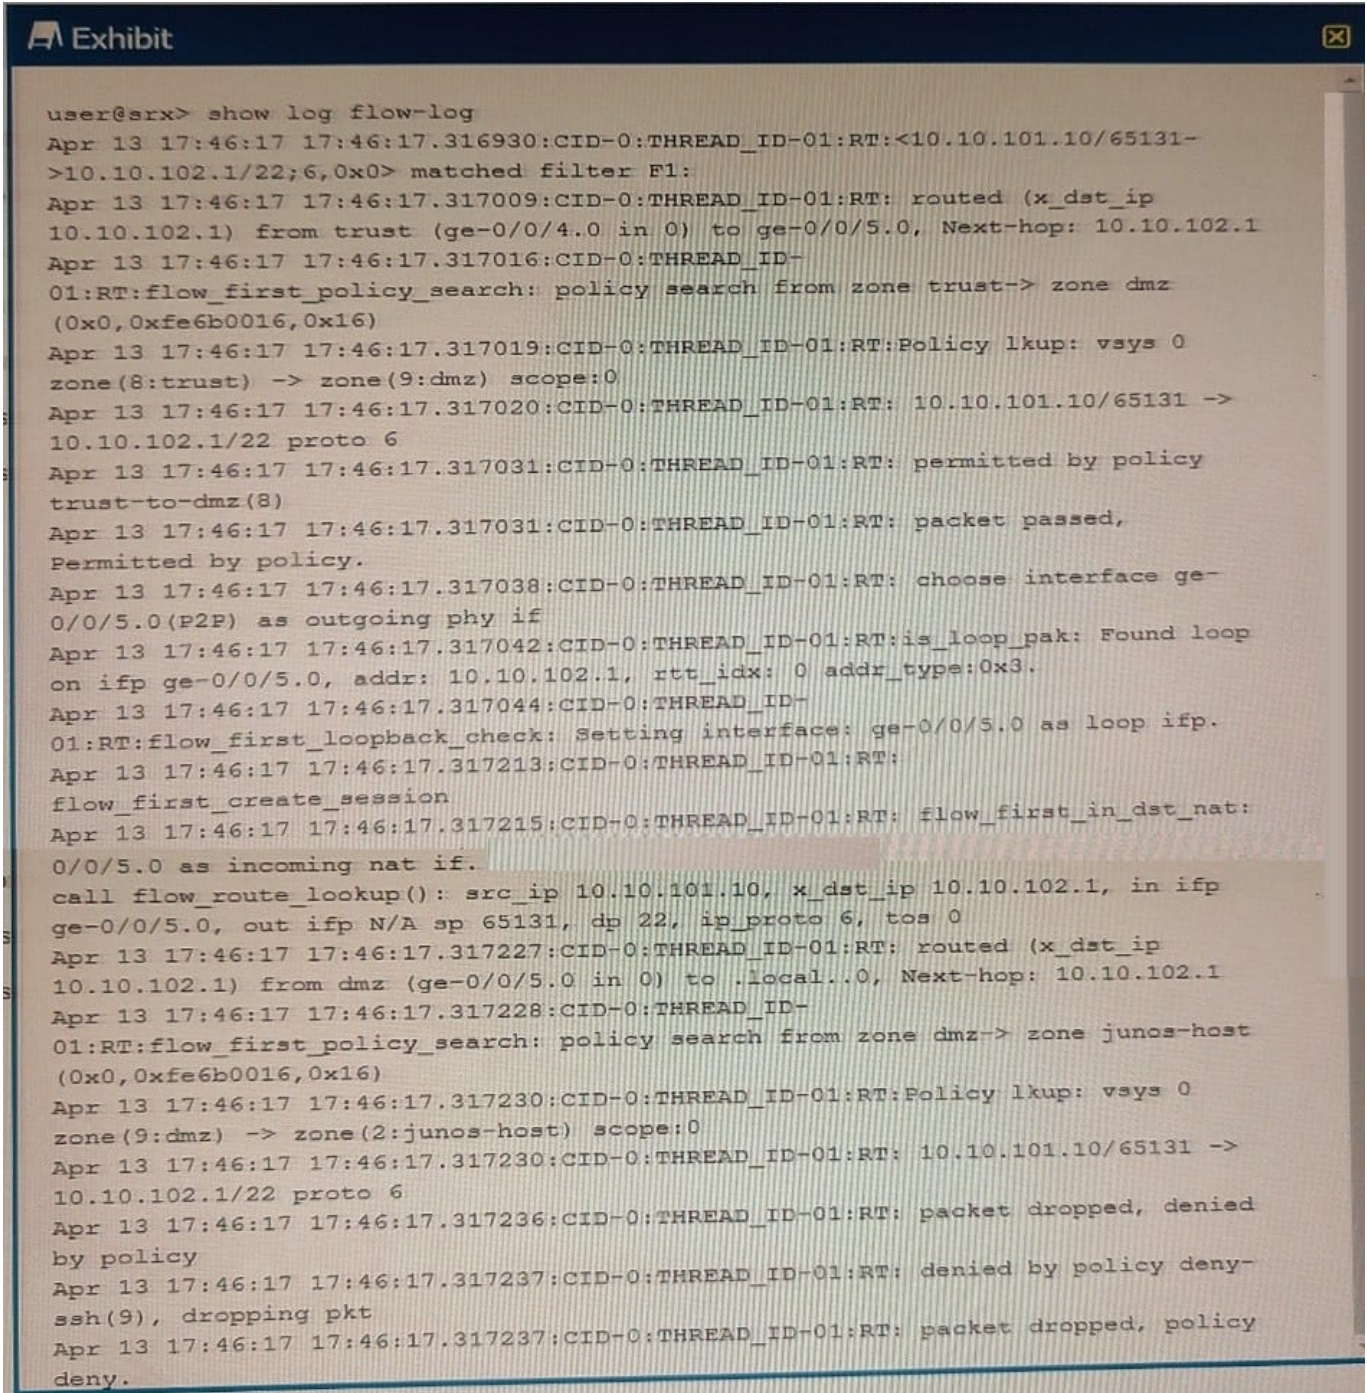

Which statement is correct regarding the output shown in the exhibit?

- A. The remote gateway address for the IPsec tunnel is 10.20.20.2
- B. The session information indicates that the IPsec tunnel has not been established
- C. The local gateway address for the IPsec tunnel is 10.20.20.2
- D. NAT is being used to change the source address of outgoing packets

Correct Answer: B

QUESTION 2

Exhibit

You are using traceoptions to verify NAT session information on your SRX Series device. Referring to the exhibit, which two statements are correct? (Choose two.)

- A. This is the last packet in the session.
- B. The SRX Series device is performing both source and destination NAT on this session.
- C. This is the first packet in the session.
- D. The SRX Series device is performing only source NAT on this session.

Correct Answer: AB

QUESTION 3

You configured a chassis cluster for high availability on an SRX Series device and enrolled this HA cluster with the Juniper ATP Cloud. Which two statements are correct in this scenario? (Choose two.)

- A. You must use different license keys on both cluster nodes.
- B. When enrolling your devices, you only need to enroll one node.
- C. You must set up your HA cluster after enrolling your devices with Juniper ATP Cloud
- D. You must use the same license key on both cluster nodes.

Correct Answer: BD

When enrolling your devices, you only need to enroll one node: The Juniper ATP Cloud automatically recognizes the HA configuration and applies the same license and configuration to both nodes of the cluster.

You must use the same license key on both cluster nodes: The HA cluster needs to share the same license key in order to be recognized as a single device by the Juniper ATP Cloud.

You must set up your HA cluster before enrolling your devices with Juniper ATP Cloud. And it is not necessary to use different license keys on both cluster nodes because the HA cluster shares the same license key.

QUESTION 4

The monitor traffic interface command is being used to capture the packets destined to and the from the SRX Series device. In this scenario, which two statements related to the feature are true? (Choose two.)

- A. This feature does not capture transit traffic.
- B. This feature captures ICMP traffic to and from the SRX Series device.
- C. This feature is supported on high-end SRX Series devices only.
- D. This feature is supported on both branch and high-end SRX Series devices.

Correct Answer: AD

Explanation: <https://forums.juniper.net/t5/Ethernet-Switching/monitor-traffic-interface/td-p/462528>

QUESTION 5

SRX Series device enrollment with Policy Enforcer fails To debug further, the user issues the following command show configuration services security--intelligence url

```
https : //cloudfeeds . argon . juniperaecurity . net/api/manifeat. xml
```

and receives the following output:

What is the problem in this scenario?

- A. The device is directly enrolled with Juniper ATP Cloud.
- B. The device is already enrolled with Policy Enforcer.
- C. The SRX Series device does not have a valid license.
- D. Junos Space does not have matching schema based on the

Correct Answer: C
