QUESTION 1

How do you add a foreign key to an existing table created by another module?

- A. Create etc/db_schema.xml file with the table node and constraint child node
- B. Run the command bin/magento setup:db-schema:upgrade
- C. This can only be done with raw SQL in a Schema Patch file
- D. Create the etc/db_constraints.xml file and specify foreign key there in the constraint node

Correct Answer: B

QUESTION 2

What is the connection between product attribute sets and categories?

- A. Categories have no connection to product attribute sets, and any product can be assigned to any category
- B. Each category is linked to a single product attribute set, and only products from that attribute set are allowed in the category
- C. Each category is linked to a single product attribute set, and only products from that category's set or any of its parent categories
- D. Categories can be connected to multiple product attribute sets, and only products from one of those sets are allowed in the category

Correct Answer: D

QUESTION 3

While reviewing a layout file named sales_order_view.xml you notice the element

What is the purpose of this element?

- A. Replaces the customer_account handle with sales_order_view
- B. Nothing, this element has been deprecated
- C. Adds the customer_account handle to the page's handles list
- D. Updates the current page handle to customer_account

Correct Answer: D

QUESTION 4

You need to find all orders in the processing state. You have written the code:

```
$orderRepository->getList($searchCriteriaBuilder->addFilter('state', 'processing'));
```

When you run the code, you get the following exception:

```
Uncaught TypeError: Argument 1 passed to Magento\Sales\Model\OrderRepository::getList() must be an instance of Magento\Framework\Api\SearchCriteriaInterface, instance of Magento\Framework\Api\SearchCriteriaBuilder given.
```

How do you resolve the exception?

- A. Use dependency injection to load an instance of the SearchCriteria class
- B. Change the getList parameter to: `$searchCriteriaBuilder->addFilter('state', 'processing')->create()`
- C. Clear generated code to get a new version of SearchCriteriaBuilder
- D. Specify a preference in di.xml to map SearchCriteriaBuilder to SearchCriteriaInterface

Correct Answer: B

QUESTION 5

A merchant tasks you to keep sales managers out of the system configuration backend pages.

How do you do that using the admin interface?

- A. You remove access to the restricted pages from each user's ACL settings
- B. You create a role with limited permissions and assign all sales manager users to the new role
- C. This is not possible in a native Magento instance and requires customization
- D. You create a role with access to the system configuration pages and assign it to all users except the sales managers

Correct Answer: B
